SUPPORTING THE NEXT GENERATION OF ENTERTAINMENT INDUSTRY LEADERS

Looking back at the past year there are so many superlatives to remember – not least the astonishing growth of our sector detailed in this yearbook – but if I had to pick one, it would be the return of Oasis.

I don't think I'll ever forget that show. The music was great, of course, but what made it unforgettable was the crowd – thousands of people singing, laughing, crying, remembering, becoming a living, breathing community, united by the music that was the soundtrack to their lives. That energy didn't stop when the lights went up. It sent people back to their streaming services, back into record shops, back to rediscover albums they hadn't played for years. One great night out became a whole new chapter in so many people's lives.

The power of community is something I see everywhere across ERA. As I write this, I am recovering from the rigours of ERA's Indie Retail Conference. After a Christmas spent mostly talking to the same two or three people, suddenly being in a room with hundreds of passionate, noisy, opinionated music people was both exhausting and completely energising. I went home shattered – but in the best possible way.

What struck me most wasn't just the scale – close to 300 people, spread across three floors – but the mood. Independent retailers, labels, distributors, partners, all in one place, and not a whiff of gloom in the air. No doubt in the back of many minds were, of course, the usual practical worries about business rates, margins and the cost of doing business in 2026, but overwhelmingly what you heard was excitement. People talking about new releases, new artists, new ways of reaching customers. It's an energy you won't find in many businesses.

And that's a perfect way into the wider story of the past year. We live in a world that feels more unsettling by the day – politically, economically, emotionally. Milk and bread might be getting more expensive, but so is everything else that makes life bearable. In that context, the idea that music, film, TV and games are somehow "discretionary" feels increasingly outdated. These things are how people unwind, escape, connect, and in many cases cope. They are part of our mental health toolkit now.

Entertainment has gone from being a treat and a luxury to a necessity.

I see that in my own life. One minute I'm binge-watching the latest Netflix series, the next I'm streaming a playlist on my phone, then I'm buying a record I loved when I was 18 because something's reminded me of it. None of these things replace each other; they sit alongside each other. Video and games don't always get the attention they deserve in the headlines, even though their growth is phenomenal. But look at how people actually live, and you can see how deeply woven all of this content has become.

I love how *Stranger Things* was released last year in blocks, turning streaming back into an event again. People watched apart, but together – dodging spoilers, messaging friends, staying up

LINDA WALKER
CHAIR ERA

"CONTENT HAS BECOME DEEPLY WOVEN IN OUR LIVES"

"THE CONVERSATION AROUND AI HAS BEEN MEASURED AND PRACTICAL"

too late to catch the next episode. It's not that different to how we all used to gather around the TV on a Sunday night, and it shows that even in a digital world, shared cultural moments and shared personal connection still matters.

Making personal connections is part of what makes initiatives like our Future Leaders Programme so special. A year on from its launch, I'm more convinced than ever that we've got an extraordinary generation coming through. They're confident, curious, engaged, and already making things happen. They want to learn, but they also know what they bring to the table. Put someone from an indie store next to someone from Amazon and you don't get hierarchy – you get mutual respect and a genuine exchange of ideas. ERA should be incredibly proud of that.

ERA welcomed two fantastic new board members this year, Lizzie Dickson of Google and Safiya Lambie-Knight of Spotify. Both are people I've worked with for years, and I know the energy and insight they bring will make a real difference.

Of course, no review of the year would be complete without mentioning AI. It's everywhere, and emotions still run high. But what has impressed me about the ERA community is how measured and practical the conversation has been. We've been through technological revolutions before, and while there are challenges, there are also real opportunities. Seeing more licensing deals emerge, with proper payment and clear opt-in or opt-out for artists, feels like a shift from endless litigation to something more constructive. The principle is simple: creativity has value, and people deserve to be paid for it.

Innovation runs through everything our members do. Subscription streaming in its current form will inevitably mature. The days of double-digit increases are already behind us in advanced markets like the UK and growth won't always come from simply adding more users, so the question becomes: what's next? New formats, new tiers, new experiences, new revenue streams – some of them probably haven't even been invented yet. But if there's one thing I've learned, it's that the people in this industry don't sit still. They roll up their sleeves and get creative.

Finally, a word on the Official Charts Company, a key part of the ERA ecosystem. Not only is ERA – representing the suppliers of the data which powers it – a 50% owner of the Official Charts Company, the Official Charts are an important revenue source for the association. It is no secret that the consumer-facing charts for which the Official Charts Company is best-known have faced their challenges in the age of streaming, but this too has created opportunity. We at ERA alongside our partners at the BPI have approved substantial investment in the Official Charts Company's platform and the fruits of this should become clear in the coming months. It will open opportunities to further improve B2B services, uncovering new insights into the data generated by ERA's members and allowing further international expansion.

This substantial vote of confidence in the future of the Official Charts Company is yet another reason why I feel optimistic. We've had eleven years of growth, yes – but more importantly, we've got an industry full of passionate people, strong communities and a willingness to adapt. That's a powerful combination. And after a day at ERA's Indie Conference, surrounded by people who wouldn't trade what they do for a yacht in the Caribbean, I'm more convinced than ever that we're on the right path.

INVESTMENT AND CREATIVITY OF DIGITAL SERVICES AND RETAILERS DRIVES GROWTH

The woes of the UK economy and wider world are sadly well-known to us all, but from an ERA perspective, I am glad to report that we have had a spectacular start to the year.

The first indication came when I returned from the Christmas break and realised that while for years the festive break has been overshadowed by all kinds of nasties - from distribution problems to members facing financial woes- this time, uncharacteristically, it had passed without a single drama.

No sooner had I digested this than our year-end numbers emerged with a very pleasant surprise indeed - 2025 sales of music, video and games had substantially exceeded expectations.

Pre-Christmas our best estimate had suggested an increase for the year of somewhere around 4%, comfortably ahead of inflation, but unspectacular. In January we were able to announce that in fact our sector had increased sales by a substantial 7.1% to another all-time-record of £13.3bn.

Record-breaking sales have become something of a habit for our sector in recent years, but this result really is something to be proud of, capping an 11 year run of year-on-year growth.

Credit for that run belongs overwhelmingly to the investment, creativity and entrepreneurialism of digital services and retailers. From the 8% increase in video revenues driven by digital services to the whopping 18.5% increase in vinyl sales championed by physical retailers, this was truly a result to be proud of.

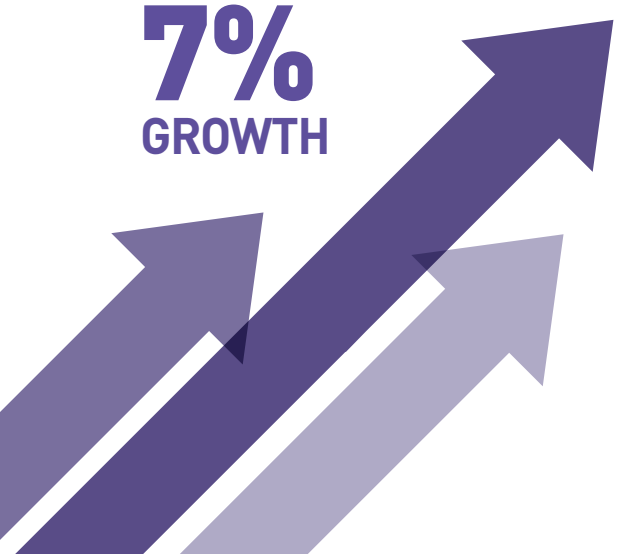

In the face of such statistics it is easy to forget that at the heart of our business are individuals, and a potent reminder that it is people who make the difference came in early January with our fifth successful Indie Conference. From the vantage point of 2026 and over a decade of gradual revival in the indie sector it may be tempting to believe it was all written in the stars. It was not. This was no foregone conclusion. It is a direct result of the skill, determination and deep understanding of their local communities of independent retailers.

Alongside the growth of our sector ERA's membership also continues to grow and is double the level of just 15 years ago. Now we expect it to grow even further with the opening up of membership to a broader range of

KIM BAYLEY
CHIEF EXECUTIVE ERA

7%
GROWTH

"AT THE HEART OF OUR BUSINESS ARE INDIVIDUALS"

related organisations. This is in part a response to demand - as the range of ERA's services to members has grown the demand for those services, in particular research and insight, has also grown. Opening up membership allows us to satisfy this demand. At the same time it is also a reflection of the ever-more-central role ERA and its members play in the broader industry. We are delighted to have already welcomed the first cohort of these new members.

"DSPs ARE FUNDING MORE THAN 60 INITIATIVES SUPPORTING MUSICIANS AND CREATORS"

One of the biggest developments for ERA over the past year was the launch of our Future Leaders Programme, dedicated to identifying and nurturing the next generation of entertainment executives. We inducted our first five Future Leaders almost exactly a year ago, with two additional inductees announced, as will be the case each year going forward, at our successful Summer Party. I am glad to say that the feedback from our Future Leaders has been overwhelmingly positive with particular praise for the mentoring opportunities we are offering. But this is very much a two-way relationship and it is clear that ERA is also benefitting substantially from the Future Leaders' input.

The most notable example this year was the research our Future Leaders proposed into the scale of support ERA members give to musicians and particularly UK artists. As a direct result of this we were able to reveal that digital services are currently funding 60 different initiatives benefitting musicians while independent retailers are currently staging over 4,000 in-store and out-of-store performances a year, the majority of them featuring UK artists.

It was a dramatic proof of the value of the Future Leaders' input. In just a year it has become a tent pole ERA activity alongside such established elements such as research and insight, our role as organiser of Record Store Day and our lobbying on behalf of the sector.

I'm glad to report all these too enjoyed success. Record Store Day 2025 was the largest and most successful yet in the event's 18 year history, with the number of stores participating increasing to 278 and sparking the highest weekly album sales from independent stores seen in the UK since at least 1994. Our other major promotion, National Album Day,

organised in collaboration with the BPI also enjoyed success and is fast becoming a fixture in the calendar.

In research and insight we made a significant upgrade to our industry-standard consumer tracking study, switching to AI-powered research agency Focaldata. The first fruits of that partnership look very promising.

Meanwhile in Government Affairs we continued to have a very busy agenda as we argued our sector's case on both music streaming and the consultations on AI and copyright.

I have long believed that the ERA team is the best in the business and I was therefore delighted when ERA was indeed shortlisted for Team of the Year at the Trade Association Forum Awards. I would like to give a particular shout-out to ERA Head of Operations and my de facto deputy Megan Ogleby-Page who is currently on maternity leave, while also welcoming back Phoebe Scott who has returned to ERA to cover during Megan's absence.

I feel extremely fortunate to have such a team, and of course to represent such a vibrant membership.

THE POWER OF CONNECTION

LUCIE CASWELL
CHIEF INNOVATION AND GOVERNMENT AFFAIRS OFFICER

Happy 2026. Subtext; time to regroup. A new year comes with a natural instinct to reconnect. We check-in with ourselves, in the context of what we have done and what we want to do. It's our annual 'MOT' of how we are relating to the world, in work, in person or in life. This assessment requires us to think of the other things we are connected to and compared with, to evaluate and to plan. We look at all the information which affects us to figure out what it amounts to and, what next. All this relational data creates the textures which form our foundations and inform our decisions.

Shake the snow-globe and see how it falls, for a new year. The patterns shape the next frame in our story and the next bar of our soundtrack.

A very human analogy for our creative tech sector, at this time. New tech which presents

a new scale of information and possibility, has shaken up our world and we are learning to form possibilities from the myriad of potential surrounding us. How do we connect the dots from the deluge of information to help us thrive? Will it fulfil our imaginations and make both technical and artistic creativity flourish or, will it change our futures unrecognisably? All of us in the creative-tech bubble will say that 2025 was, well, a lot.

Some certainties are settling fast.

Data gold dust

Creative connections affirm authenticity. When we experience art, a complicated exchange of information is involved. As the audience, we receive artistic information with our experience and context. We return our opinion through nostalgia, resonance and value. This exchange forms a new layer of information from which any future experience is recognised, compared and evaluated. We don't usually notice the complexity of these exchanges any more than a listener to a song considers how that song has been recommended to them, how we find that photo, or, how the artistic creators get paid. Behind the scenes, vital origin data is created and exchanged.

Those of us 'under the hood', in the legal and operational weeds of how creativity is put into the world, recognise this critical data exchange. Art comes into the world with origin data which identifies what it is and whose it is. In the UK, creativity has copyright by virtue of merely existing; This 'meta'-data tells the world whose rights they are. With that information, every piece of creative content's journey can be quantifiable, verifiable and controllable. One piece's particular

information acts like a beacon for itself and, it also informs the whole market, alongside the metadata of other content. Individual activity and engagement become micro parts of macro information and value propositions. This precious data ensures that no part of any individual work gets lost in the ocean of information which together, becomes an audience, a trend and a market, full of individually valuable work and collectively powerful outcomes. The more this information interacts, the more it can also be improved and enriched. The better data is, even the smallest amount can be compared, found, protected, valued and directed. Every ingredient in the artistic universe has a barcode to hold and share – if, it sets out in life with those essential details in place. They are proof of authenticity.

Noisy conversations in the creative sector about what tech can do and whether outcomes will be positive or otherwise. What we know is that any outcome is only valuable for art, if art shares its original data and the market works together to maintain, recognise, and evaluate it as the exchanges and interactions happen, from creator to fan. Everyone in our supply chain is actually in a circular economy of data and value. Our common activity is sharing, connecting and communicating. With the unprecedented scale and pace of content available, accessible and new today, authentic data is the ultimate collaboration of our time.

Sophisticated Survival

While press shout about existential threats, ours would be to ignore the rare minerals that we truly rely on - our data. Headline words in our sector are authenticity and transparency. Both are stories of connection. Connection of creativity to ownership, connecting human art to value and all defined, controlled, and monetised through communicating that meta information. We need a level of sophistication in our tools to facilitate this vital conversation. Incredible new tools to enhance, protect and facilitate that communication and to enable all that we cannot yet imagine. Data innovation is business critical, not optional.

Size matters, connection works

We can't manage the scale and density of vital data we will need to, without machine intelligence able to act at light-speed, globally. The exciting thing is that some of this technology already exists. Companies are developing and coalescing software which is proven able to know how a fraction of copyright sounds and whose it is, anywhere. Technologies are enabling creators to realise imagination in ways impossible to articulate before and certainly impossible to afford to create. Powerful efficiencies are now enabling access to diaspora of fans thousands of miles away, connected by tech and able to value and remunerate creators anywhere. A very personal tribe communicating on a global stage. We love this tech.

At the same time, the conversation hits a dissonance when technology feels, too big. Systems in general and politics in particular, are slow to keep up with the explosive speed of imagination and creativity, whether technical or artistic. Some take advantage of this and run before everyone is at the starting line. We are seeing the consequences of those false starts as the courts fire up and everyone must go backwards to realign and start again, collaboratively. Always tricky to do. Acting unilaterally in a collaborative world, leads to distrust of the form, rather than of those who didn't play by the rules. Not everyone loves this moment.

Stopping there, however, would be a dangerous track to take. We saw historically, how stepping away from new technology let value race right out of the door until someone innovative blew a whistle and pointed in another direction.

"COLLABORATION OF CREATIVITY AND TECHNOLOGY CREATES OPPORTUNITY"

Streaming became valuable, sharing went from peer-to-peer to markets of engagement and hundreds of innovators were able to create tools to catapult new artists, new genres and new money into growth, sustained now for well over a decade. The success was not about a different kind of tech; it was about a connected approach.

The sophistication of music discovery online makes new connections, new tribes and new experiences for fans who are encouraged to see their artists live and to buy in all formats. Vinyl has surged and young generations are even buying CDs. The record shop is again a vital, real life meeting point for digital generations and a stage to tomorrow's artists, hosting 1 in 40 of the UK's gigs in 2025. That's an outstanding demonstration of the demand to connect with artists and a clear connection between digital and physical creativity. We have always connected in all formats. 'Grassroots means creation and discovery in the community. Now the algorithm and the high street are connected too, and it works. These connections must be sustained for the circle of creative value to work. As fans, collaboration across formats makes total sense. Something to remember, as an industry.

Why? Because collaboration has always meant, more. Collaboration of creativity and technology creates an amplification of opportunity. A phone was created, a person picked it up - but it was together that binary signals became gossip, news, revelations. A picture, a script, a song and an outfit, together become a magical, blockbuster film. The machinery underneath shares information to reach the right audiences and return the right value, keeping this magic coming. Connection makes something stronger and achievable in new form. The possibilities evolving in tech today are opening up opportunities for new creative heights, new imaginings, many impossible without that essential collaboration. Tech is just a tool without connection to a purpose, so the outcomes are for us to decide.

Zooming out. Sharing is caring

We live in divisive times. Not because of technology but because of the very human preoccupation with power. Weakening connections within our communities leads to distrust but if we communicate, we can direct our own narrative. I am therefore so heartened to see our creative community collectively calling out divisive manipulations in the wider world. It is testament to the incredible, connecting power of art, that it can create real community against dangerous prejudice. It also shows that we are alive to connection, we are welcoming of it, in all our senses, and we are incredibly powerful when communicating through art. Let's take our connected strength as the fuel for our own success.

"THE SOPHISTICATION OF MUSIC DISCOVERY MAKES NEW CONNECTIONS"

Connecting with technology realises potential. Collaborating means shared control and success. From the day we took art home, whether over the airwaves or in our pocket, we made certain that the brightest future of art, tech and possibility, is in our hands.

ERA FUTURE LEADERS

Megan Ogleby-Page
HEAD OF OPERATIONS

2025 saw the launch of ERA's Future Leaders Programme, created to celebrate the next generation of executive talent across digital platforms and physical retailers. Its objective is to incubate fast-rising young executives by providing networking and mentoring opportunities as well as ensuring their voices are heard in what is a fast-changing entertainment landscape.

The execs shown below make up the Future Leaders Group, having been inducted via a new Rising Star Award scheme launched at ERA's annual Entertainment Champion Awards at Summer Party.

Outcomes delivered in the programme's inaugural year include:

- Established a Sector Wide Mentoring Scheme: strategically pairing members of the group with prominent figures from the across the entertainment industry, to provide dedicated support for professional development and career advancement opportunities.
- Facilitated a Speed Networking Event: coordinated a dynamic speed-networking event at Sky's Headquarters, bringing together industry leaders and innovators for a series of structured 15 min sessions 1-1. This was designed to broaden the group's professional network and provide access to invaluable expertise and advice from a diverse range of executives.
- Conducted a British Music Landscape Audit: initiated and devised an in-depth audit of initiatives hosted by ERA members that support emerging UK talent – an area of particular focus for the group itself.

The group will continue to meet in 2026, feeding into the wider ERA agenda as well as continuing with mentoring and development opportunities as coordinated by the ERA team.

DSPs SUPPORTING UK TALENT

UK streaming services are funding more than 60 separate initiatives to support the music industry. A selection of which are shown here and a full list of which can be found on the ERA website.

ERA research reveals that the largest category of music initiatives supports diversity and inclusion, with the second largest supporting new and emerging talent. Examples of artists supported by DSPs include:

- Floating Points spotlighted by SoundCloud's regional campaigns;
- Jorja Smith backed by Spotify's Riff & Runs R&B focused playlists;
- Laraaji who headlined Qobuz's sponsored Brick Lane Jazz Festival;
- Pa Salieu supported by YouTube's Legacy Series, pairing Black UK fashion designers with musicians;
- Sam Fender supported early on by YouTube Music's Video Tentpole

Support for individual artists is also accompanied by a range of initiatives supporting education, particularly education about the music industry. Examples include:

- Breakthrough - Amazon Music's global artist development program, supporting emerging talent with funding, exposure, and guidance - powered by a key partnership with the Featured Artists Coalition;
- YouTube Accelerator - run in partnership with the Music Managers Forum, equipping independent UK managers with vital training and networking opportunities;
- Girls Make Beats - SoundCloud's non-profit organization geared towards expanding female representation among music producers, DJs and audio engineers;
- Deezer Collaborates with the Featured Artists Coalition for masterclasses focused on women and queer artists, providing training on streaming, marketing, and social promotion;
- Spotify's partnership with Youth Music to a create a fund supporting 15 grassroots youth spaces.

ENTERTAINMENT RETAIL IN CONTEXT

Each year the Leisure Industries Research Centre at Sheffield Hallam University compiles statistics on UK consumer expenditure across various leisure activities, encompassing holidays, gambling, dining out, and home entertainment.

The 2025 dataset depicts a yearly resurgence in spend on entertainment and leisure in the UK that has tracked consistently upwards since the chaos of the pandemic. Overall spending hit £456bn, up 5.7% versus 2024.

Spending is split into two main, self-explanatory categories – 'In Home' and 'Away from Home' – whilst in home growth was just 2.9%, away from home growth ran well above inflation at 6.5% year on year.

£99bn was spent on activities taking place in the home, whilst £357bn was spent away from home.

Within the 'Away from Home' category there was very strong demand for 'holidays and tourism' in 2025 up 7.7% year on year. Spending on 'Holidays Overseas' was particularly strong with £85bn spent, up 9.5%.

'Eating & drinking' – the largest sub-category in the 'Away from Home' segment – saw strong growth year-on-year with consumer spend in pubs and restaurants rising by 5.9% to £176bn in 2025, while 'Neighbourhood leisure' grew by 6.0% to £69bn, with exceptionally strong gains in local entertainment up 10% year on year.

'In the Home' leisure spend - covering categories such as 'House and Garden' and 'Home Entertainment', rose by 2.9% to £99bn in 2025 with the strongest gains recorded in 'video games and music' up, up +7.1% to £13.3bn.

VIDEO OVERVIEW

2025 was another strong year of trading for the UK's video entertainment industry. Posting an 11th consecutive year of growth, consumer spend was up 8% versus 2024, with total revenues generated surpassing £5.4bn.

As it has been for the best part of a decade, it is consumer spend on subscription-based streaming services such as Netflix, Amazon Prime, and Disney+ that delivered the vast majority of those revenues and a large chunk of the growth. According to figures from Futuresource Consulting, the total number of current SVoD subscriptions in the UK rose by 3% to 53.2m in 2025, while a round of price rises across some of the major streaming services helped boost actual spend to £4.9bn, up 8.8% versus 2024, marking a 16th consecutive year of growth.

Led by 'A Minecraft Movie' and 'Bridget Jones: Mad About the Boy' the UK cinema box office enjoyed another year of incremental gains, and this translated into marginal growth in the transactional video market, particularly across the digital formats. £245m was spent on electronic sell-through titles last year, up 4.5% while £137.4m was spent on digital rentals, up 1.7% year-on-year.

In terms of the video category's physical formats, sales of the once-mighty DVD continue to trend sharply south. According to figures from Official Charts, unit sales dipped below the 6m mark (-17.4%) in 2025, generating £64.7m through the tills, down 13.4% year-on-year.

It was a different story for the category's high-def formats as combined Blu-ray / 4K UHD sales topped £84.2m, up 3.2% year-on-year and once again outperformed DVD. This was achieved despite a small decline in volumes, down 4.1%, reflecting the fact that the higher value 4K UHD format continues to command a bigger share of the physical format sales mix. Around 1.4m 4K units were sold worth £36.5m, up almost 16% year-on-year.

Those gains weren't, however, quite enough to offset the declines in DVD spend and combined physical format revenues of £152m were 5.4% shy of 2024's total.

VIDEO MARKET SALES BY SEGMENT

The Subscription Video on Demand (SVoD) market continues to dominate the UK's home video industry, delivering consistent annual growth and securing an ever-greater share as the model matures. Its dominance is reflected in the chart below, showing that over 90% of total consumer spend on video entertainment last year was accounted for by streaming behemoths like Netflix, Amazon Prime, Apple TV+ and Disney+.

While annual growth rates are beginning to stabilise, the market is still nearly 40% larger than it was in 2021.

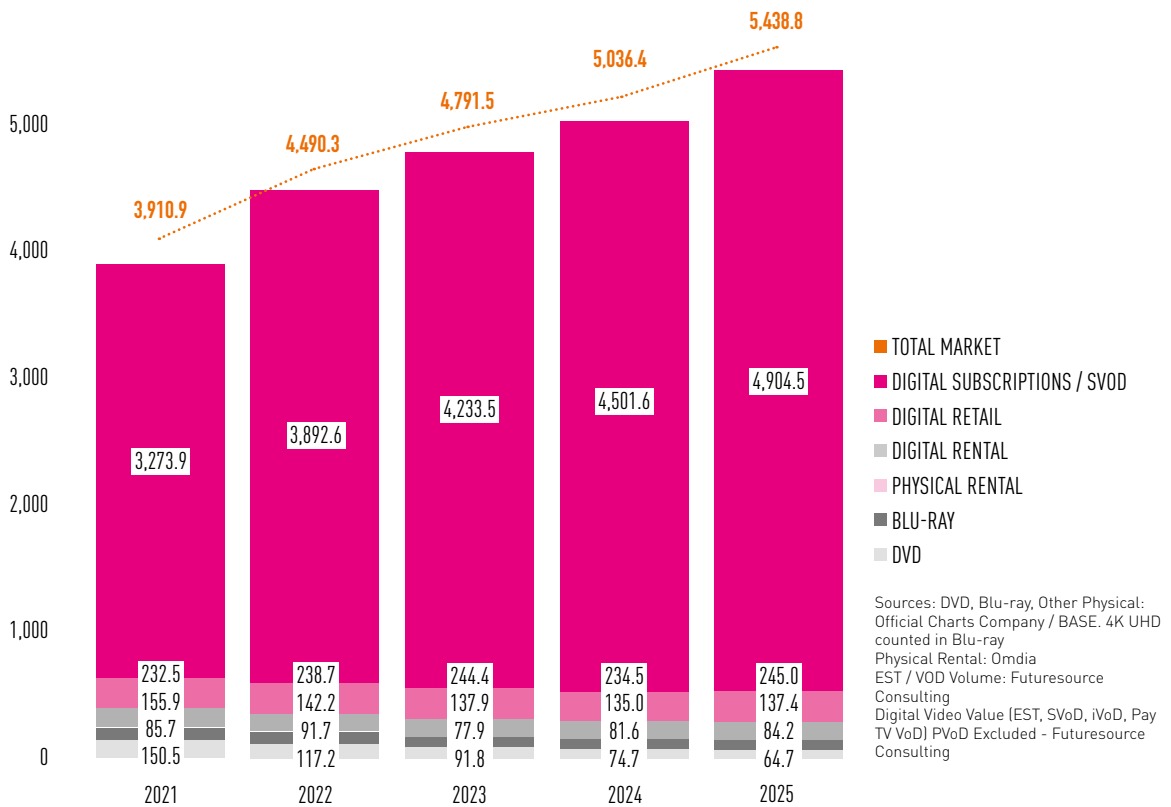

Meanwhile, the UK's digital retail (EST) and rental (VOD) markets have rebounded back into growth after the declines posted in 2024. Those gains were small though and the overall value of transactional digital spending remains dwarfed by the SVoD market. This dynamic has put further pressure on the formats' respective market shares, with both falling back again in 2025. The £245m spent on EST titles last year secured 4% of the market, while digital rentals, worth £137.4m, was enough for 3%.

SHARE OF VIDEO MARKET
BY FORMAT: 2025

Despite a 2nd consecutive year of growth in sales of Blu-ray and 4K UHD discs, the combined performance of video's physical formats over the last five years is one of steady, trending decline. Spend in the DVD and Blu-ray market dipped below £150m in 2025, enough to secure 3% of total expenditure in the video category.

THE DIGITAL VIDEO MARKET

According to Futuresource Consulting, just over £5.3bn was spent on purchasing, or accessing, digitally delivered video content in the UK last year, up 8.4% versus 2024, with nearly all of that growth delivered by the SVoD sector.

Some of the major subscription services instigated another round of price rises during 2025, countering a flattening subscription volume curve and stagnating levels of household penetration.

In 2025, Futuresource estimated that there were a total 53.2m active subscriptions in the UK representing a rise of 1.6m, or 3%, year-on-year, following much smaller annual growth of 800k subscriptions recorded in 2024. Household penetration also ticked up by around 300k to 18.0m in 2024, up 1.6% year-on-year.

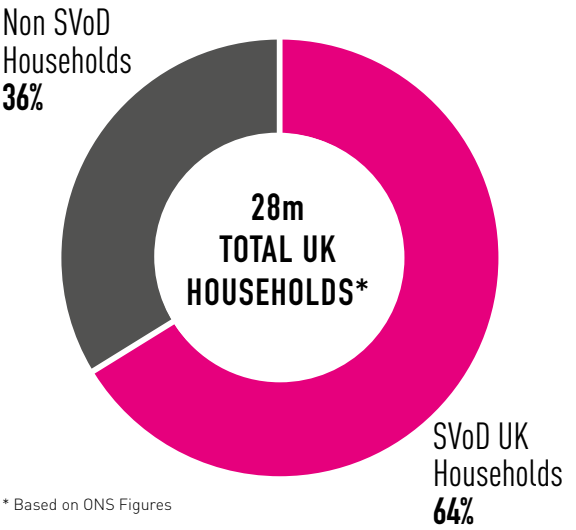

The 18m UK households where at least one SVoD subscription is active represents around 64% of total households in the UK, suggesting there is ample room for the sector to expand into. Faster growth in the overall volume of accounts, compared to household penetration, means we are stacking subscriptions at a higher rate, borne out by the numbers opposite. On average, each household that pays to stream video in the UK has hit 3 active subscriptions per household, up from 2.9 in 2024.

UK HOUSEHOLD SVOD PENETRATION 2025

* Based on ONS Figures

SVOD SUBSCRIPTIONS AND HOUSEHOLDS (MILLION) 2021 - 2025

Values generated in the digital retail (EST) market continued to trend upwards overall in 2025, with total spend up 4.5% to £245m. When you split film and TV content out from that total, however, fortunes diverge by genre. Spend on EST films grew by 7.4% year-on-year to surge through the £200m for the first time, thanks in part to spend on Premium Electronic Sell Through (PEST) content, a model that gives the consumer a much earlier opportunity to buy than is normally allowed by traditional theatrical windows. This growth was just enough to offset long-term declines in the TV EST segment where spend fell by another 7.5% to £43.0m.

The digital rental VOD market remains flattish with volume down 1.6% to 30.5m units, although average prices are up, driving an incremental £2.4m in value, up 1.7% year-on-year.

DIGITAL VIDEO VALUE BY SEGMENT (£ MILLION) 2021 - 2025

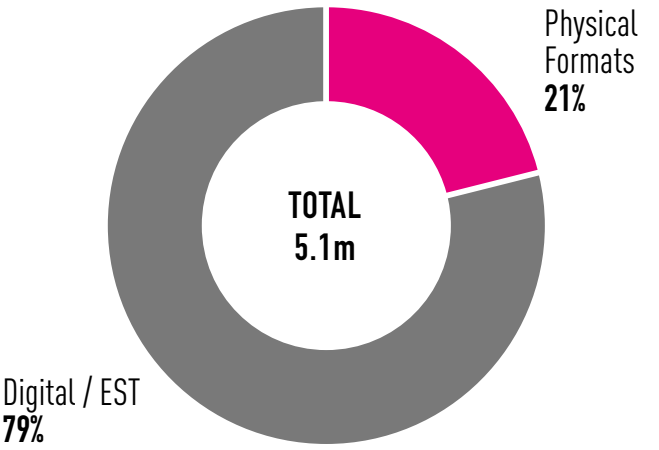

EST VS PHYSICAL

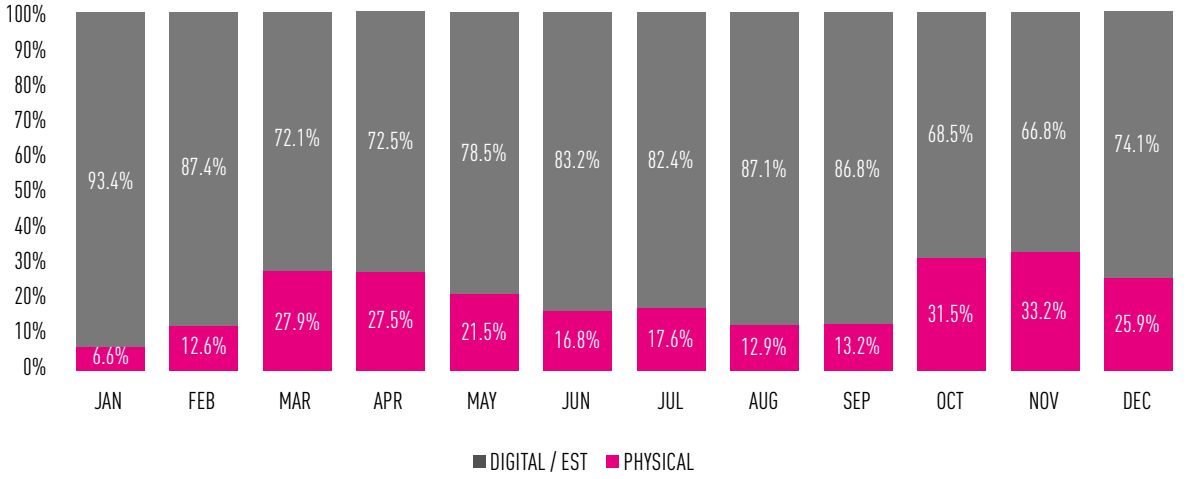

The Top 20 video titles in the UK sold a combined 5.1m units over the course of 2025 with EST formats securing 79% of those sales, up from 76% in 2024.

As the analysis below shows, EST consistently dominated volume sales mix across every month of the year, peaking at 93% in January when the year's biggest film, 'Wicked' enjoyed a digital window. DVD and Blu-ray sales traditionally enjoy a performance boost in the final quarter, as gift purchasing returns in time for Christmas, with November the best month for physical in 2025, securing 33% of overall volumes.

PHYSICAL / EST SHARE OF 2025'S TOP 20 BESTSELLING SELL-THROUGH TITLES

PHYSICAL / EST SHARE OF TOP 20 SELL-THROUGH TITLES BY MONTH 2025

THE PHYSICAL VIDEO MARKET

While the UK's overall video market posted a 11th consecutive year of growth in 2025, spending in the physical video segment retuned a 16th consecutive year of decline, as consumers prefer to stack streaming subscriptions and purchase digitally.

DVD volume sales dipped by 17.4% to 5.8m last year generating £64.7m at retail, down 13.4% year-on-year. Blu-ray, by way of contrast, enjoyed second consecutive climb in annual revenues, with 4.5m units sold worth £84.2m, up 3.2%.

When you split the Hi-Def 4K UHD format numbers out from those Blu-ray totals, growth is trending up even more steeply with annual spend rising 15.9% to £36.5m. 4K now represents 43% of Blu-ray value and 25% of total physical format revenues.

Physical disc rental remains a marginal and declining segment of the market and is now worth £3.2m, according to figures from Omdia, around 30% down versus 2025.

Overall, £152m was spent on DVDs, Blu-rays and 4K UHD discs last year, 5.4% down year-on-year.

VIDEO MARKET PRODUCT AVAILABILITY

With the market for DVDs declining sharply in value terms and consumer demand weakening, the number of new titles made available for the format has naturally fallen too. This dynamic played out in 2025 with the number of new film and TV titles coming to DVD falling to 777, 28.3% down versus the 1,084 new titles made available in 2024.

By way of contrast, the number of new titles coming to Blu-ray last year hit 1,282, up 5.9% year-on-year and the highest number since 2021. It reflects a buoyant physical HD video market in the UK where two consecutive years of sales growth has been posted, driven by particularly healthy 4K UHD sales. The availability of new titles on 4K has accelerated significantly with numbers leaping by 37.3% to 629 in 2025, as more remastered, catalogue and classic content is brought to the format by the studios.

Unlike DVD and Blu-ray, EST is a relatively young, frontline format with the focus heavily skewed to the instant availability and purchase convenience of new releases. During the lockdown year of 2021, however, an unprecedented number of new titles were released to digital formats, bringing the total available for purchase close to 20k.

Each year since 2021, between 500 and 1,000 new titles have been made available on electronic-sell through formats and the total now stands at 22,286, comparable to the 25,486 available on Blu-ray. DVD still dominates in terms of the total numbers, though, with more than 130k titles theoretically available to buy.

VIDEO AVERAGE SELLING PRICES

The video category's average selling prices increased in 2025 but rises remained relatively stable, mostly in line with the inflationary pressures affecting the wider UK economy.

Prices rose most sharply in DVD where the average unit retailed at £8.54 last year, up 6.2% versus 2024. The 'specialist, generalists and independents' channel commanded the highest prices at £8.72, a rise of 6.1% while the lowest were found online with the 'home delivery' channel selling each unit at an average £8.39, up 6.1% year-on-year.

At £12.39, Blu-ray ASPs (excl. 4K) recorded an increase of £0.41 per disc on average, up 3.4% versus 2024. This price was just above averages found on the high street, at £12.32 while those commanded in the home delivery channel were slightly higher at £12.44, up 3.7% versus last year.

BRICKS AND MORTAR VERSUS ONLINE

ERA's latest annual comparative analysis of UK video entertainment spending underlines the near-total transformation of the market, with digital and online channels accounting for the overwhelming majority of consumer spend.

In 2025, UK consumers spent approximately £5.4 billion on subscription streaming services such as Netflix and Disney+, across transactional digital platforms including Sky Store, and online retailers like Amazon selling physical formats for home delivery. Together, these channels represented 99% of total video market value last year.

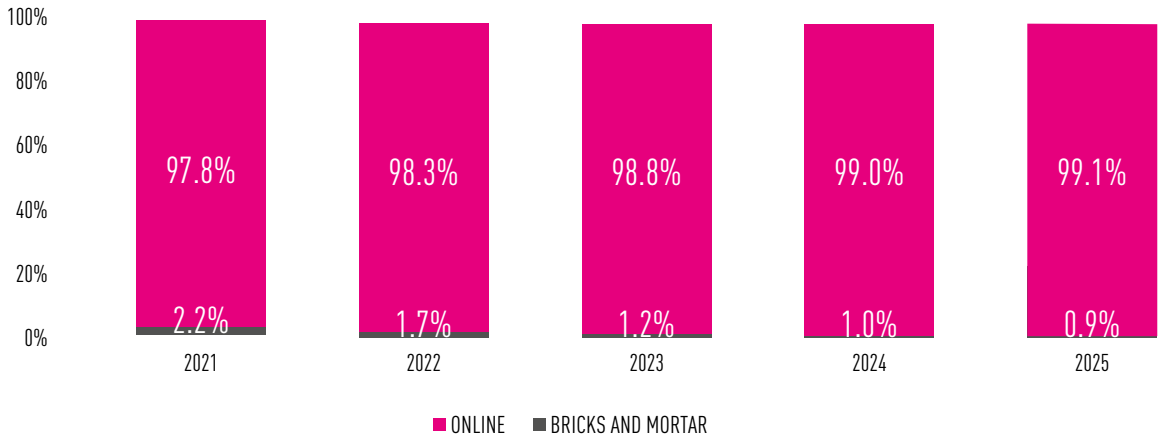

Physical sales through bricks-and-mortar retailers — including specialist entertainment stores and those supermarkets that continue to stock reduced ranges of DVDs and Blu-rays — generated approximately £50.2 million, equivalent to 1% of overall spend.

VIDEO RETAILERS

According to Kantar, the total number of bricks and mortar retailers stocking physical video underwent another steep fall in 2025, down from 1,463 shops in 2024 to 1,112, a decline of 24% year-on-year.

126 fewer supermarket outlets carried video product in 2025, maintaining a downward trend that has accelerated over recent years. In terms of total numbers, though, supermarkets still dominate the bricks and mortar channel, with 926 shops trading in DVD and Blu-ray last year, representing 83% of the UK total.

The number of shops in the multiples channel stocking video fell particularly sharply, down 217 outlets to just 10, a decline of 96%, largely down to WH Smith exiting the category altogether.

hmv - the only bricks & mortar retailer left in the specialist sector selling physical video – reported a decline of two shops in their estate selling DVDs and Blu-rays with 121 trading in 2025, while the indie channel lost 6 outlets compared to 2024, down to 61.

VIDEO RETAILERS – PHYSICAL

Analysis from Kantar, focusing on the UK's DVD and Blu-ray value sales by retailer type, shows a slowing in the annual rate of decline in spending on physical video formats in 2025, and a small uptick in the share of those sales secured by high street operators like hmv.

Around £149m was spent overall on combined physical video formats in 2025, meaning the market fell by less than 5% year-on-year, the smallest annual decline in 15 years.

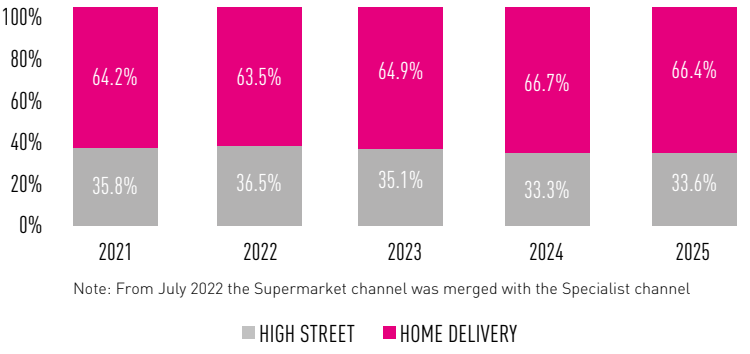

The high street channel which, since 2022, has included the only two UK grocers that continue to sell physical video – Asda and Morrisons – plus specialist retailer hmv, generated £50.0m through the tills last year, down less than 0.5% year-on-year. That means high street channel share stands at 33.6%, up from 33.3% in 2024.

Physical online retailers like Amazon and Zavvi registered £98.8m in sales, down around 7% year-on-year with home delivery share now standing at 65.2%, slightly down on the 66.7% it secured in 2024.

VIDEO CHARTS

Released to retail in the first week of January, box office smash, 'Wicked' put in an extraordinary sales performance across the course of 2025 to top the UK's annual combined physical / EST chart. Over 983k units were sold, with 87% of those sales coming via EST.

The 183k digital-only units sold upon release ranked as the highest 'week 1' volumes of the year, while sales were given a textbook drafting boost in November when sequel 'Wicked – For Good' opened in UK cinemas.

'A Minecraft Movie' was released to sell-through in late June and racked up 405k unit sales over the second half of the year to take the No.2 position in the film chart, while 'Gladiator II', sold 380k units to slot in at No.3.

'Bridget Jones – Mad About the Boy' enjoyed the 2nd biggest box office success of all the titles in the top 20 and was released to sell-through in the first week of April, shifting 340k units over the remaining weeks of the year. 'Jurassic World – Rebirth' rounded out the top 5 with 318k units sold.

11 of the next 15 titles closing out the Top 20 were reboots or sequels, demonstrating just how important established franchises are to modern commercial success, although 'Conclave' (178k units), 'The Wild Robot' (145k units) and Oscar-nominated 'Sinners' (142k units) show that original content can deliver hits too.

Source: ERA Quarterly Tracking Study 2025 (conducted by Focaldata)

GAMES MARKET SOFTWARE OVERVIEW

The games software market posted a fourth consecutive year of growth in 2025 with annual consumer spend rising by 7.4% year-on-year, up to £5.4bn across the combined digital and physical segments.

All of that growth was driven by the dominant digital sector where the 'full-game direct-to-console' and 'PC download-to-own' markets posted particularly strong gains with spend leaping 10.1% to just over £1bn.

The 'mobile and tablet games' segment, which includes both download-to-own and access-only games, as well as microtransaction spending, has delivered consistent, reliable growth for more than a decade now and spend grew by another 8.8% in 2025 with overall revenues totalling around £1.9bn.

After a very soft 2024 for the physical, boxed software market, where annual spend declined by fully 34% year-on-year, 2025 represented a recovery of sorts with sales down just 1.0% to £318.8m, according to figures from NielsenIQ.

GAMES MARKET SALES BY SEGMENT

As the accompanying charts show, the games software market remains both enormous and structurally complex, spanning a wide mix of devices, formats, and access models. Beneath that variety, however, spending continues to consolidate around several dominant digital behaviours.

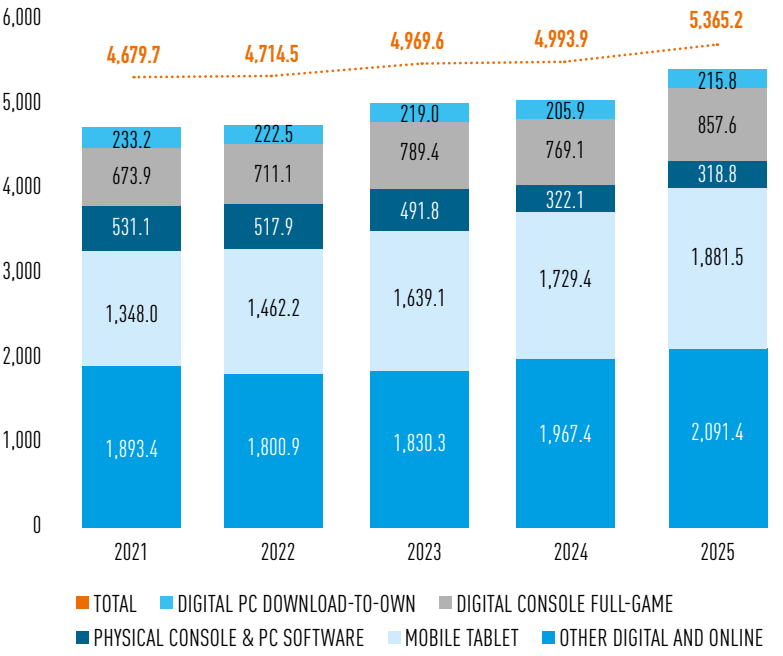

The largest revenue stream is delivered by the 'Other Digital and Online' segment, which encompasses MMO subscriptions, console-linked online services, and the vast volume of microtransactions generated by Free-to-Play titles across PC, browser, and social platforms. This segment delivered another year of growth in 2025, with spend sailing through the £2bn mark, accounting for 39% of the UK's total games software market.

'Mobile and Tablet' remains the second-largest segment and the clearest demonstration of how effectively the Free-to-Play model can be monetised. UK consumers spent almost £1.9bn on in-app purchases and microtransactions in 2025, representing 35% of total game content expenditure.

According to Omdia, spending on console and PC digital downloads of premium titles such as "EA Sports FC 26' and 'Battlefield 6' grew to just over £1bn last year — a 10% year-on-year increase — meaning the segment now represents 20% of total market value.

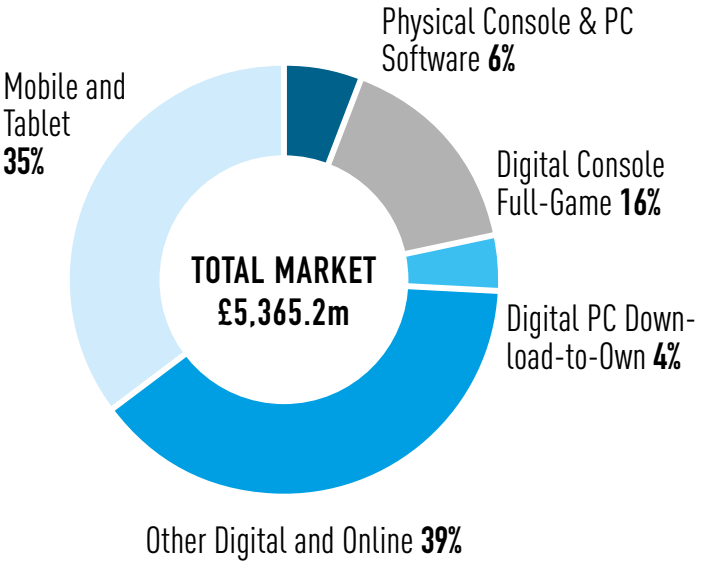

Physical full-game sales continue to track downwards although declines were restricted to just 1% year-on-year in 2025. Spend dipped to around £319m meaning boxed games now account for 6% of total software revenues.

GAMES SOFTWARE VALUE SHARE BY SEGMENT 2025

GAMES MARKET DIGITAL

The UK's digital games market returned a fourth consecutive year of growth in 2025 with consumer spend surging through the £5bn mark, 8% up versus 2024. All the key segments enjoyed strong gains, led by the indomitable 'mobile and tablet' sub-category which grew by 8.8% last year, generating almost £2bn in revenues, accounting for 37% of total digital games value.

Mobile microtransactional spend on in-game currencies, character enhancements, and other in-app features amounted to just over £1.7bn, up 8.7%, while sales of full-game titles for mobile devices were worth £52.6m, up 10.5% year-on-year. Sharp growth was also evident in the mobile / tablet subscription market which grew by 9.2% to £72.4m, reflecting a more general move to access models by the videogame consumer.

This shift is further demonstrated by the flourishing console subscription market, which posted gains of 8.9% in 2025, with £608.5m spent overall. While popular premium tiers like Xbox Game Pass Ultimate instigated significant price rises in Q4, most of the annual growth was organic, further evidence of a videogame consumer base increasingly comfortable accessing their content, rather than owning it. The segment now claims 12% of total spend in the category.

Spending on social media gaming continues to trend downwards, falling by another 10% in 2025 to £36.8m, while the PC Pay-to-Play and Casual gaming markets likewise recorded reverses, down 15.7% to £8.7m.

The Massive Multiplayer Online Games (MMOG) market, which includes subscription-based access and in-game microtransactions, returned to growth after small declines in 2024. Spending climbed 1.8% to £382.7m, now accounting for 8% of the total UK games market by value.

GAMES MARKET PHYSICAL

After posting precipitous declines in 2024, spend on physical boxed games stabilised last year with £318.8m generated through the tills, restricting year-on-year declines to just 1%.

Drilling down into performance by platform, however, reveals a picture of widespread declines offset by a significant, new-to-market revenue stream, delivered exclusively by sales of games for Nintendo's latest generation console, the Switch 2. £67.3m was spent on Switch 2 games from June onwards, representing 21% of the total physical games market in 2025.

By way of contrast, the other major platform owners – PlayStation and Microsoft – posted reverses across all their console-types. The market-leading PS5 maintained its position as top performer with £126.5m spent on physical software titles, limiting year-on-year declines to just 4.4%, this despite the console entering its 6th year in circulation. Those revenues represented 40% of total physical software spend.

Microsoft endured a very soft year of trading in the physical market with spending on boxed software titles for its flagship Xbox Series console – in its 5th year since launch - falling by 23.4% to £17.8m.

In terms of older console-types, the PS4 generated £14.8m in sales, down 45.8% year-on-year, Microsoft's Xbox One game revenues fell just shy of £1m, down 60.2%, while the original Nintendo Switch saw £83.4m spent on its titles, 36% down on 2024 totals.

The PC physical disc market posted a surprise bump in revenues in 2025, after several years of decline, with £7.3m spent, up 19.1% year-on-year.

GAMES MARKET BRANDS

Aggregating disc sales across Nintendo, Sony, and Microsoft platforms, the 2025 "Battle of the Brands" saw Sony lose its leading position to Nintendo. In a declining market, the key factor in this year's share battle was Nintendo managing to limit reverses of its older Switch console sales, while ushering in fresh revenues generated by the Switch 2. Overall, £150.8m was spent on combined Nintendo titles, up 15.7% versus the previous year, taking its share to 49% of the total.

Sony's share fell back to 45% after combined revenues fell 11.5% to £141.3m, while Microsoft's share slipped to just 6%, as sales dived to £18.8m, 26.9% down versus 2024.

BATTLE OF THE BRANDS - SOFTWARE SALES BY BRAND. VALUE (£M) 2023 - 2025

BATTLE OF THE BRANDS 2025

GAMES MARKET HARDWARE

According to NielsenIQ a total 2.1m games consoles were sold in the UK during 2025, up 6.9% versus 2024 volumes. In terms of value, £769.6m was spent in the UK, up 11.1% year-on-year.

The launch of Nintendo's Switch 2, released halfway through the year, was responsible for all of that market growth, with £262m spent across 737k units sold.

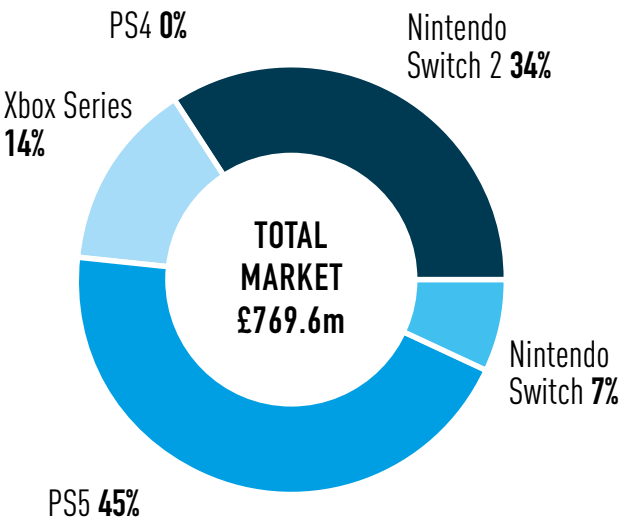

Sony's PS5, in its 6th year of production, introduced some limited upgrades throughout the year, but annual sales dipped below 900k units, worth £345.1m, down 16.1% year-on-year.

Microsoft's Xbox Series console is also deep into its cyclical life and that is reflected in rapidly softening sales, with just 289k units sold in 2025, worth £108.4m, down 29.3% year-on-year.

Elsewhere, Nintendo's original Switch console continued to shift decent volumes despite the release of the Switch 2, with 219k units sold, worth £54.1m, while sales of the PS4 and Xbox One can now be counted in the low thousands.

In terms of value share of the market, Sony's PS5 retained its lead in 2025 taking 45% with sales worth more than that of the Switch and Switch 2 combined, giving Nintendo 41% of overall sales. The Microsoft Xbox Series continues to ship share with total values generated worth just 14% of the total market.

Source: NielsenIQ. Excludes TV Console/Micro Console/Retro Console. Revenue based on SPLIT HW revenue.

Hardware SPLIT revenue - due to the fact that units/revenue from Consoles is split, some revenue from Hardware Bundles is counted under Software or Accessories and 1 unit of the software element / accessories element is also split.

The SPLIT revenue for Hardware is shown above, because if you sum the total SW-HW-ACC you arrive at the true total. If we put UNSPLIT harware revenue in these figures, there would be double-counting for total revenue.

GAMES MARKET ACCESSORIES

After posting solid growth in 2024 the games accessories market – which includes sales of peripherals like controllers, mice and headsets - fell back in 2025. According to NielsenIQ, £562m was spent overall, down 6.8% year-on-year. 10.4 units were sold, down 9% versus 2024.

AVERAGE SELLING PRICES

The average cost of a game across both the physical retailer landscape and digital channels increased sharply in 2025, largely due to the launch of the Nintendo Switch 2 and its suite of new titles, some of which hit the market at a retail price exceeding £70 on release.

NielsenIQ recorded the average cost of a physical boxed game at £36.29 last year, almost 15% higher than in 2024. Over in the digital sector Omdia estimated the average selling price of a full-game digital unit – across PC and console – at £19.66, just under 10% higher than 2024 prices.

It's worth remembering that the deeper availability of catalogue and budget titles in the digital space, especially across PC titles, keeps average prices well below those found at physical retail.

Despite increasing by 14% in 2025, the market's lowest average selling prices for boxed games remain in the home delivery channel at £35.78, just shy of £4 cheaper than those found in the high street specialist channel, at £39.41. The supermarket channel saw ASPs increase by 20.9% last year to £41.22, reflecting the limited, frontline ranges carried in-store, meaning average prices are naturally higher than those found elsewhere in the category.

PHYSICAL ENTERTAINMENT SOFTWARE AVERAGE SELLING PRICES 2023 - 2025

AVERAGE SELLING PRICES BY GAMES FORMAT 2025

PRODUCT AVAILABILITY

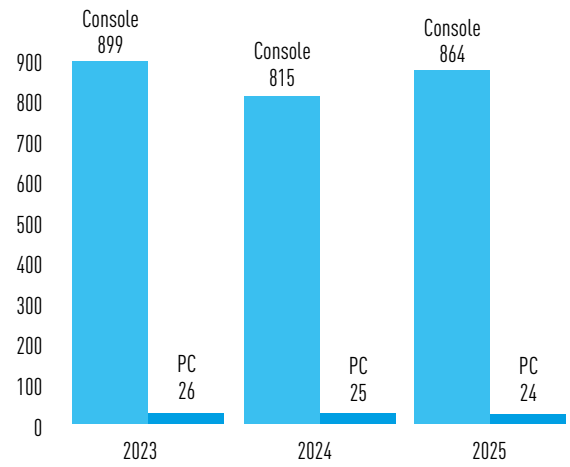

The combined effect of current PlayStation and Xbox consoles approaching their late cycle limits, and some triple A games eschewing any physical release at all, the number of new titles coming to market on disc has begun to flatline slightly over the last couple of years.

According to figures from NielsenIQ, 864 new console titles were made available in the UK last year. While that is 49 more than in 2024, it is 35 fewer than in 2023, the year that consistent growth in numbers started to really stall.

It is also worth noting that much of that new title growth in 2025 came courtesy of the Nintendo Switch 2, which launched in June and - as is normal with a new console release - enjoyed associated fresh software titles to help build adoption.

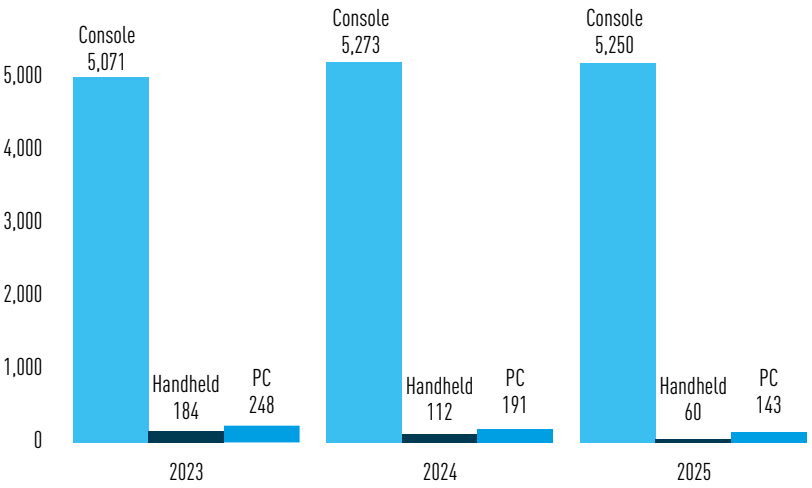

The analysis also counts the total number of titles available for purchase in the UK over the course of the year. While totals in the home console market remained flattish at 5,250 titles, there were sharp decreases in the number of titles available for PCs and handheld consoles, down 25.1% and 46.4% respectively year-on-year.

BRICKS AND MORTAR VS ONLINE

The growth of digital and online is continuing to reshape the UK entertainment retail landscape. Consumers increasingly value convenience, immediacy and access to extensive content libraries — strengths that digital storefronts and physical online operators are well positioned to deliver.

The UK videogames market reflects this long-term evolution in purchasing behaviour. The ability to download full titles instantly, purchase additional digital content, and subscribe to gaming services has significantly expanded how and where consumers engage with games. As a result, spending has progressively shifted toward digital channels and online retail.

In 2025, more than £5.3bn — representing 99.1% of total games software spending — was transacted through digital purchases or online physical retailers. This highlights the scale of change in distribution models across the sector.

While bricks-and-mortar retailers saw a temporary uplift in 2022 as high street footfall recovered post-pandemic, spending has since continued to move toward digital and online channels. In 2025, over-the-counter physical sales totalled £45.7m, accounting for 0.9% of overall market expenditure.

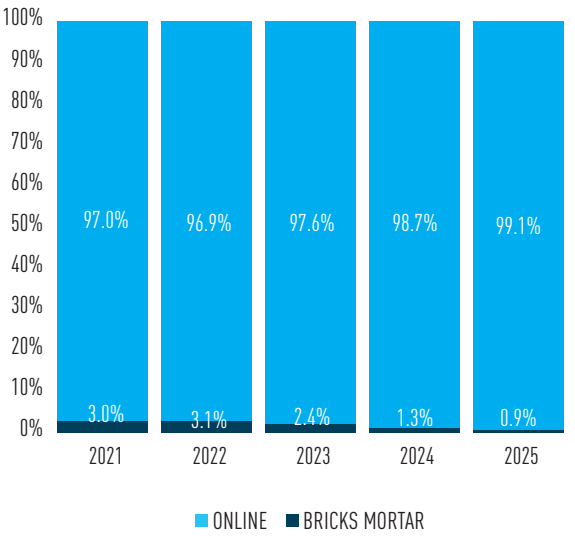

Despite this structural shift, physical retail continued to play a role in the ecosystem through 2025 — particularly in driving discovery, supporting major launch moments, serving collectors and gift purchasers, and maintaining a high street presence for games. The market has not disappeared, but evolved, with physical and digital channels increasingly operating as complementary parts of a broader distribution landscape.

GAMES RETAILERS & DIGITAL SERVICES

As the analysis above has shown, the UK games software market continues to move increasingly online, whether that's fully digital, or towards physical online retail. Bricks and mortar retail channels have adapted to this digital transition by adding a wide range of digital content gift cards to their mix that provide credit for services like Xbox Live and PlayStation Store, to in-game currencies such as Minecraft Coins and Roblox Robux.

For the eighth consecutive year, the number of UK retailers selling boxed games has declined, according to NielsenIQ. In 2025, 2,752 outlets recorded software disc sales, down 2.5% from 2,822 in 2024. This decline was largely driven by the grocery sector, as supermarkets continue to retreat from the physical videogames market. Another 52 stores exited the category entirely in 2025, bringing the number of supermarkets in the UK still stocking boxed games down to 554.

There were reductions in outlets across almost every type of physical retailer last year, except in the 'Game & Software Specialist' sector, which saw a small increase, rising from 318 to 344.

When retailers selling digital content cards are included, the total footprint expands significantly. 3,107 supermarkets offered carded digital content products in 2025 and still dominate in terms of numbers. Overall, the number of outlets trading in any videogame software-related content stands at 5,322, down 4.1% year-on-year.

GAMES RETAIL PHYSICAL

ERA's 'Physical Formats Share by Retailer Type' tables, based on data provided by NielsenIQ, highlight the ongoing decline of expenditure in high street specialists and supermarkets in the boxed games market.

The charts show how high street specialists like Game and retailers like Smyths Toys and Argos, after a brief recovery post-pandemic, began to lose share again in 2023, and then more sharply in 2024 and 2025.

High street specialists saw their market share dip to 12.2% in 2025, after a decline in annual spend of £13.7m. The physical format games consumer continues shift towards online with home delivery operators like Amazon securing another record share of the market, up to 86% in 2025.

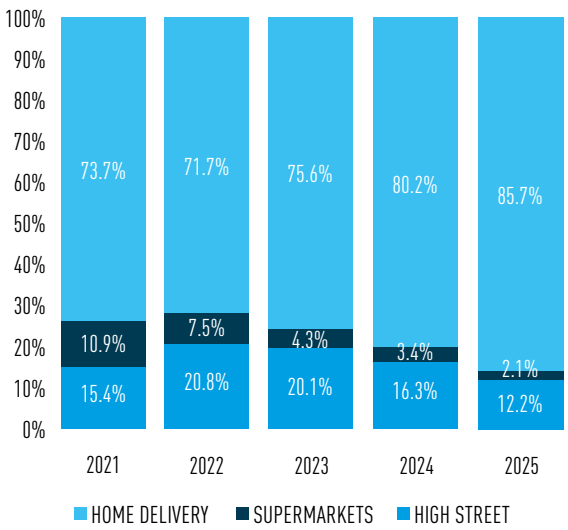

Physical online retailers have also benefitted from the continued reduction in space dedicated to videogames across the supermarket sector where the decline in boxed game sales during 2025 significantly over-indexed versus the market, down over 38% versus 2024. Grocery share of the physical games market now stands at just 2.1%.

CHARTS – COMBINED

ERA's Top 20 Combined Games Chart – which merges physical sales data from NielsenIQ with digital sales figures from Sparkers / ISFE - features a host of longstanding franchises at the top, together with one or two new titles from Nintendo that helped usher in the 2025 launch of their Nintendo Switch 2 console.

With just under 2 million units sold, 'EA Sports FC 26' comfortably secured the No.1 position, shifting more than double the 879k units 'Battlefield 6' sold to take the No.2 spot. Although overall sales fell short of the 2.1m units 'EA Sports FC 25' sold in 2024, the franchise can take comfort from the fact that 'EA Sports FC 25' itself finished as the 3rd bestselling game in the UK with 724k units sold over the course of the year. The combined digital sales share of both titles hit around 73%, steady versus 2024.

PHYSICAL / DIGITAL SHARE OF 2025'S TOP 20 BESTSELLING TITLES

Source: Digital: Sparkers / ISFE
Physical: NielsenIQ
Note: Splits only included where there is both physical and digital data available.

Nintendo's 'Mario Kart World' Switch 2 exclusive put in an extraordinary performance to finish 4th in the chart with 545k physical disc units sold. It would have undoubtedly challenged the top 3 if Nintendo shared their digital, direct-to-console numbers with the industry. The latest entry in the Harry Potter gaming universe, 'Hogwarts Legacy' – originally released in early 2023 and with no major updates in 2025 – continues to deliver strong volumes regardless, shifting just over 536k units. With Hogwarts Legacy 2 deep in production, this looks like another franchise that is here to stay.

'Battlefield 6' conquered all in the PC download-to-own (DTO) chart with precisely 257k units sold to top the lot, over 110k units more than 'Red Dead Redemption 2' managed, taking the No.2 spot. 'Football Manager 26' sold just over 98k units in 2025 to take the 5th spot in the chart.

MUSIC FORMAT PREFERENCES - % OF POPULATION

Music streaming is the most popular way to consume music with over 84% of the population having a paid for or free music subscription

ERA Quarterly Tracking Study 2025 (conducted by Focaldata)

MUSIC OVERVIEW

The UK music market delivered its 12th consecutive year of growth in 2025, driven by a steep increase in spending on vinyl - across both LPs and singles - and a rise in streaming subscription revenues. Across all formats, combined spending hit a record £2.5bn in total, marking a 4.2% increase year-on-year. In value terms, the market is now well over a quarter bigger than it was in 2021.

According to ERA/BPI estimates, consumer spending on music streaming subscriptions exceeded the £2bn mark in 2025, a 3.2% rise from 2024, accounting for 83.4% of the total market value.

As measured by the Official Charts Company 222.6bn individual music streams were recorded across both subscription and ad-funded tiers in 2025, a 5.2% increase versus the previous year.

The vinyl LP market continues to surge with just over 8m records sold in the UK last year, up 13.3%, which generated around £232.2m at retail - an 18.5% increase versus 2024. Combined with the £5.8m spent on singles, more than £238m was spent on music vinyl in 2025. This marks the format's 18th consecutive year of growth in the UK and the 6th straight year that those gains can be recorded in double-digits. Vinyl now represents over 9% of total music spending.

CD album sales fell by 7.4% in terms of volume last year but higher average selling prices helped restrict retail value declines to just 1% year-on-year, with £125m spent in total – remarkably consistent with totals posted in 2023 and 2024.

It was another mixed year for the download market with spend on MP3 album bundles falling back 6% to £23.4m, while MP3 tracks enjoyed a small bump in sales for a second consecutive year with sales up 0.4% to £16.5m.

The music formats enjoying the steepest growth curve – although admittedly from a small base – can be found in the 'other physical albums' segment, where cassette and hi-def Blu-ray audio disc sales are recorded. The £4.6m spent in 2025 represents a 95.1% increase versus 2024 totals.

THE STREAMING MUSIC MARKET

According to Official Charts Company figures, 180.9bn premium streams were delivered across paid-for subscription tiers offered by services like Spotify, Amazon Music and YouTube Music in the UK last year. This marked an 5.6% increase year-on-year, accounting for 81% of total streams volume.

Just over 41.7bn streams were recorded across ad-funded, free tiers, up 3.6%, representing 19% of the total.

Audio-only streaming continued to drive overall market growth, with 210.3bn streams recorded in 2025, up 5.4% on the previous year and representing 94% of total streaming activity. After returning to growth in 2024, video-only streams enjoyed another modest boost in 2025, up 2.4% to 12.3bn, which accounts for 6% of the total.

Within the audio-only streaming segment, paid-for premium streams grew by 5.5% to 180bn representing 86% of the total audio volume. While ad-funded audio streams form a much smaller part of the streaming market, volumes are also in growth versus 2024, up 4.5% to just over 30.3bn, taking a 14% share of the total.

Unlike audio streaming, the vast majority of video-only streams come from free, ad-supported plays on platforms like YouTube. In 2025, ad-funded video stream volumes grew by 1.3% to 11.4bn, around 150m more streams than were recorded in the previous year. While from a small base – annual volumes have never exceeded 1bn streams - premium video streaming remains the fastest growing segment in that market with 857.7m plays measured in 2025, up 19% year-on-year and enough to grow share to 7% of total video streams.

In terms of market share by record label, artists signed to the three majors - Universal Music, Sony Music, and Warner Music - accounted for approximately 71% of total UK streaming volumes, with Indies taking a 28% share. 1% of total streams remain unmatched to any label.

PHYSICAL MUSIC MARKET

The UK's physical music market took another significant step forward in 2025 with combined annual spending on vinyl, CDs, and other physical music formats surpassing £368m, marking an 11.5% year-on-year increase. While spending on CDs declined slightly versus 2024, with the £125m spent 1% down year-on-year, combined vinyl LP and singles sales grew impressively, up 18.6% to £238.1m.

The Official Charts Company have also recorded strong growth across music's niche physical formats, like Blu-ray audio and cassettes, with the £4.6m spent up a massive 95.1% versus 2024. In volume terms, just over 8m vinyl LP units were sold, 941k more than last year, up 13.3% compared to 2024. CD album sales volume declined by 7.6% year-on-year, while combined CD and vinyl singles sales dipped 4% to just under 500k units.

PHYSICAL MUSIC MARKET BY FORMAT: VALUE £M 2021-2025

THE VINYL MARKET

The UK's vinyl LP market continues to boom, with Official Charts Company data confirming its 18th consecutive year of growth in both volume and value. Unit sales rose by 13.3% year-on-year, driving total annual expenditure to £232.2m, up 18.5% versus 2024.

In value terms, vinyl's share of the overall physical album market increased once again in 2025 and is now worth more than 64% of total physical format sales – in 2016 it was worth just 14%.

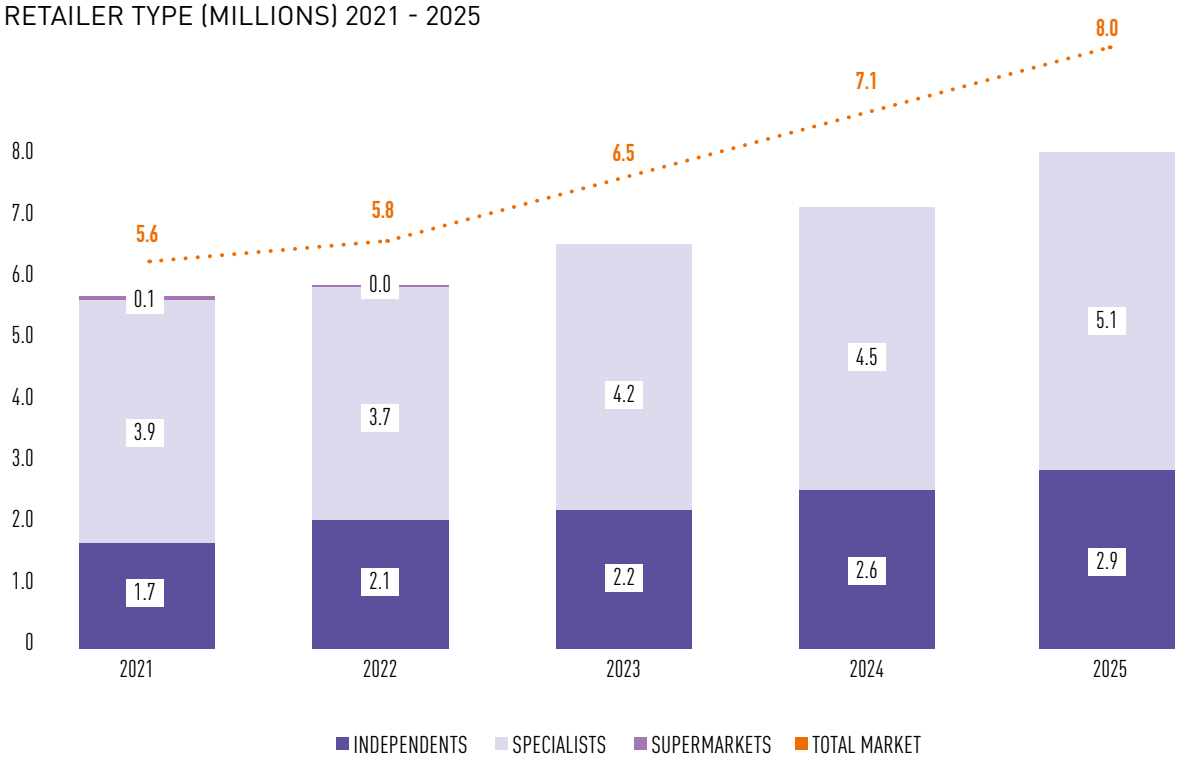

Independent retailers continue to play a major role in vinyl's growth story with 2.9m albums sold through the UK's 499 indie shops and other indie operators online. This marks a 13.5% increase versus 2025, a growth rate marginally over-indexing versus the market. Indies overall share now stands at 36.2%, matching the decade high-point set last year.

Specialist retailers, however - including hmv and online platforms like Amazon – still command the lion's share of the UK's vinyl market, securing 63.8% in 2025. The channel also enjoyed solid growth with volume sales surging through the 5m unit mark, up 13.2% year-on-year.

VINYL MARKET VOLUME SALES BY RETAILER TYPE (MILLIONS) 2021 - 2025

PRODUCT AVAILABILITY

The number of new titles made available on CD declined to 12,393 in 2025, a fall of 5.3%, or 690 fewer albums than in 2024.

Declines were steeper in the 'Other' segment - which includes non-CD physical formats like vinyl and cassettes – with 16,201 new albums being made available for purchase, down 6.1% year-on-year.

26,813 new titles were released to digital formats – including streaming – over the course of 2025, 326 more than arrived in 2024.

The total number of CD titles available has risen by 1.8% to 689,963. That's around 9.5k more than are available on digital formats, where the total has grown by 4.1% versus 2024 to 680,454.

There are now almost 270k vinyl and other physical format album titles in total available to retailers, up 6.4% versus 2024.

AVERAGE SELLING PRICES

After a relative easing in the rate of annual album price rises in the UK in 2024, 2025 saw increases pick up quite sharply again, by 10.5% to £17.90, or £1.70 more on average than in 2024.

Most of those increases continue to be driven by a very robust vinyl LP market which is transforming the overall album sales mix. The vinyl LP is an expensive format to manufacture and distribute, leading to higher prices at retail, meaning that, as it secures more market share, combined average selling prices will naturally rise. The average vinyl LP was £16.79 more expensive than the average price paid for a CD album in 2025.

The vinyl LP can also be seen as an inflation marker in the UK's transactional album market and at £29.03 in 2025 – 4.6% up versus 2024 – there is evidence upward pressures still prevail. This is compounded by the fact that the average selling price commanded for a CD rose by 7.2% in 2025 to £12.24.

It is in the 'Home Delivery' channel where album prices are rising most sharply, with the 2025 average up by 10% to £18.67. The highest average prices, however, are found across the UK's high street specialist and indie retailers, where trading is skewed more heavily towards vinyl LPs. An album in that channel now costs £19.22 on average, up 8.4% versus 2024 prices.

BRICKS & MORTAR VS ONLINE

ERA's comparative analysis of spending in the UK's music category highlights just how far the shift to streaming over the last decade or so has transformed the market. Consumer spending on music subscriptions, worth around £2bn, combined with music purchases made at physical online retailers like Amazon, totalled just over £2.3bn in 2025 and now represents 93.8% of total annual music expenditure.

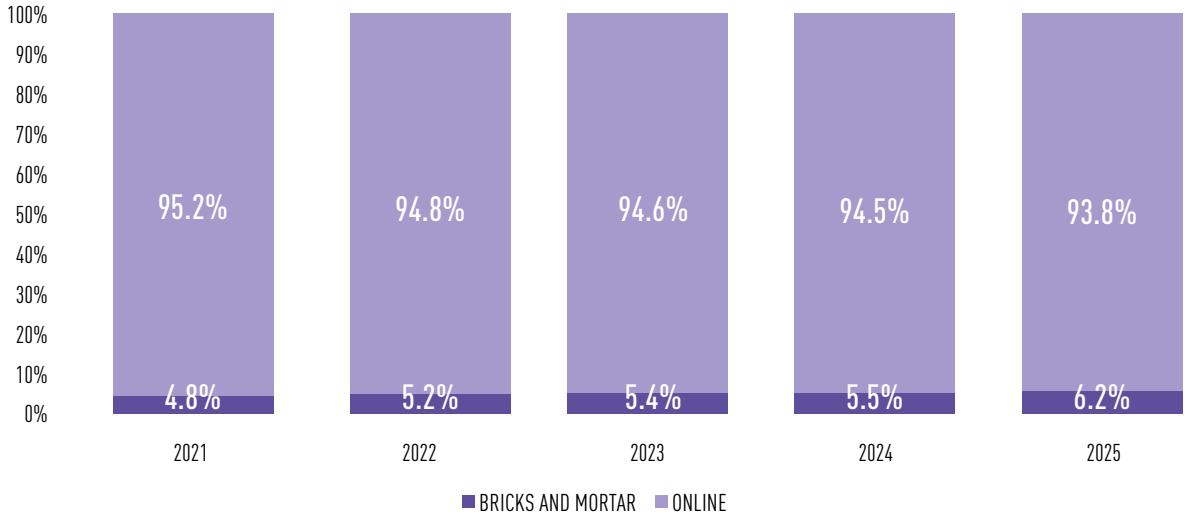

While online revenues clearly still dominate, consumer spending in traditional bricks and mortar music retailers on the UK's high streets – hmv and independent record shops – has been undergoing something of a resurgence. 2025 represented the fourth consecutive year that physical retailers increased their share of overall music revenues, with the £151.8m spent worth 6.3% of the market, up from 4.8% in 2021.

Both segments are enjoying consistent annual growth in consumer spending but the increases on the high street in 2025 (+16.7%) comfortably outstripped those online (+3.5%).

BRICKS & MORTAR VERSUS ONLINE SALES SPLIT (£ MILLION) - MUSIC 2021 - 2025

ERA Research

MUSIC RETAILERS – PHYSICAL

The overall number of bricks & mortar retailers selling music in the UK fell by 17.5% to 1,632 in 2025, according to figures produced by Kantar.

After several years of decline, the number of outlets recording sales of music stabilised in 2024, but the decline curve resumed in 2025. Most of the fall in numbers last year can be attributed to WHSmith's exit from the category, with outlets in the 'Multiples' channel falling by 276 - from 426 to 150 – down 64.8% year-on-year.

The supermarket channel still contains the highest number of shops selling physical format music (albeit with limited ranges) but the channel's retreat from the category continues. 862 supermarkets recorded sales last year, 95 fewer than in 2024.

Two fewer hmv branches were recorded as selling music in 2025, taking the 'Specialist Chain' segment to 121 outlets in total, down from 123 in 2024.

Elsewhere, the UK's buoyant independent record shop channel enjoyed yet another year of growth in numbers with an extra 28 stores trading in physical format music, taking the total to 499, up almost 6% year-on-year.

Analysis carried out by ERA research counted 35 digital service provider sites where the UK consumer can stream music from in 2025 and 20 where they can purchase MP3s.

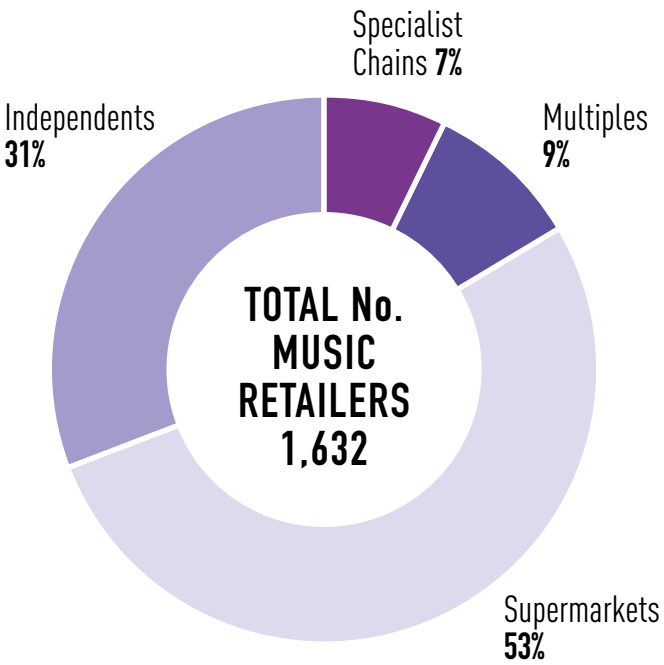

PRINCIPAL BRICKS & MORTAR RETAILERS SELLING MUSIC 2021 - 2025

	2021	2022	2023	2024	2025	change 24/25
Specialist Chains (1)	112	122	122	123	121	-1.6%
Multiples (2)	468	184	320	426	150	-64.8%
Supermarkets (3)	2,322	1,754	1,072	957	862	-9.9%
Independents	396	426	461	471	499	5.9%
Total Retailers	**3,298**	**2,486**	**1,975**	**1,977**	**1,632**	**–17.5%**

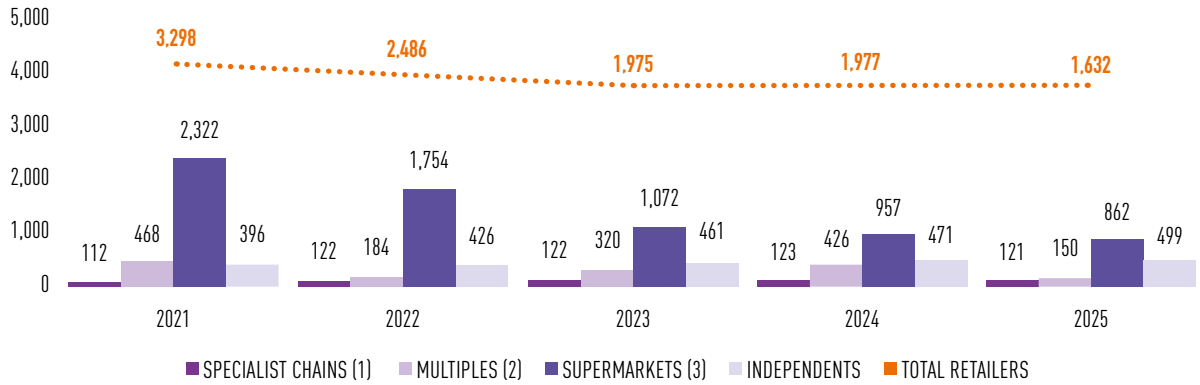

(1) Specialist Chain - HMV
(2) Multiples are Urban Outfitters, WHSmith, Matalan, Primark, Boots, Moto, Original Factory Store, B&M, Easons, and SemiChem. (Changes are most likely due to withdrawal from Audio and Video retailing/stocking).
(3) Supermarkets include Asda, Morrisons, Sainsbury's (including Locals*), Tesco (including Metro and Express*), Waitrose*, Co-Op*, and One-Stop* (*That sell audio and video titles). Supermarkets combined with multiples in July 2022
NOTE: Supermarkets merged with Multiples in 2022

PHYSICAL FORMAT £ SPEND SHARE BY RETAILER TYPE

According to analysis by Kantar, that focuses on physical format album sales by retailer type, spend on CDs and vinyl records in the UK's Indie record shops, supermarkets and hmv – recorded here together as 'High Street' – hit £149.2m over the course of 2025. That is £21.4m more than was spent in 2024, up 16.7%, with total value generated in the channel at its highest level for 5 years.

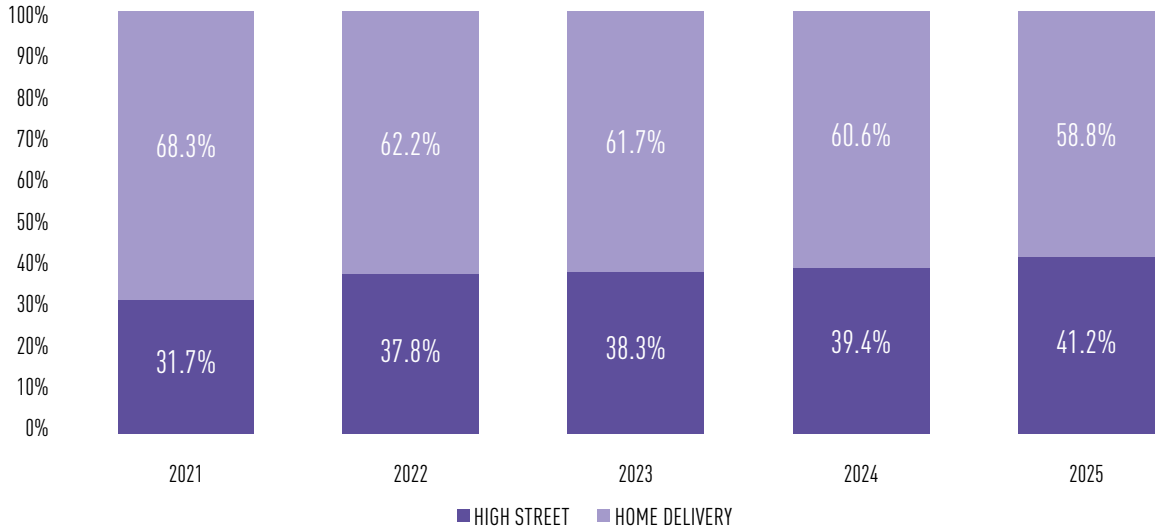

This growth has also boosted 'High Street' share of total expenditure on physical format albums from 39.4% in 2024, to 41.2% last year. It marks another positive step forward for the segment, still recovering from the shock of the pandemic that forced the shuttering of shops on the high street for long periods of 2020 and restricted trading conditions in 2021.

Spending on CDs and vinyl LPs at physical online retailers also posted solid year-on-year gains in 2025, with totals surging through the £200m mark. The 'Home Delivery' segment still enjoys the lion's share of the market, with just over 58.8% of total trade value secured by retailers like Amazon.

MUSIC CHARTS

After a couple of TikTok-powered breakout singles, Alex Warren smashed his way to the very top of the UK charts with his global hit 'Ordinary', racking up almost 262m premium and ad-funded streams, which, when weighted and combined with other formats, formed around 2.2m chart units to take No.1 in the Official Chart Company's '2025 Official Singles Chart'.

English singer, Lola Young, is one of three British females to break into the top 20 Singles Chart in 2025 as she took the no.2 spot with 1.4m chart units of 'Messy' recorded.

Elsewhere, fellow BRIT School graduate, Olivia Dean took the No.9 spot shifting 1.1m chart units of her single 'Man I Need' while Bolton-born artist, Chrystal, slotted in at No.12 with 1m units of 'The Days' counted.

Taylor Swift's 12th studio album, 'Life of a Showgirl' was released in early October and over the final three months of 2025 shifted 642k chart units to take the No.1 spot, according to the Official Charts Company. That total included 376.8k physical format copies, representing 58.7% of overall sales.

Included in those physical sales were 226.6k CD copies and 147.4k vinyl LP copies, easily enough to top those separate format charts too.

Despite being released in August 2024, Sabrina Carpenter's 'Short 'n Sweet' continued to return enormous streaming numbers through 2025, with 518k chart units recorded, 85.3% of which were streams.

The 'KPop Demon Hunters' soundtrack made it a Top 3 full house for Universal Music with 442.3k units of the title shifted since its release in early September. Consumption skewed heavily to streams representing 93.8% of the combined total.

Once again, classic collections like Fleetwood Mac's '50 Years, Don't Stop', Oasis's 'Time Flies – 1994-2009', Elton John's 'Diamonds' and Abba's 'Gold - Greatest Hits' all made the year's top 20, powered almost exclusively by the streaming market.

INSIGHT

MARKET DATA

ERA prides itself on best in class data and insight for its members.

Every week we provide market data sourced from Official Charts Company (music and video) and NielsenIQ and GSD (games and hardware).

ERA's retail members receive free access to the Official Charts Online service as well as range of reports prom NielsenIQ and GSD, which coupled with our own consumer insight data delivered by Focaldata on our members portal means that all of our members have up to date market data at their fingertips.

This market data is also supplemented by digital video and games data from Insight specialists Omdia and FutureSource as well as bespoke Insight projects.

MUSIC Market Data Available to ERA members	**VIDEO** Market Data available to ERA Members	**GAMES** Market Data available to ERA Members
Physical Music (Official Charts) CD Vinyl	**Physical TV and Film (Official Charts)** DVD BluRay 4K	**Physical Games (NielsenIQ & GSD)** Console software Handheld software Digital at store
Digital Music (Official Charts) Downloads Subscription streams Ad funded streams Music video streams	**Digital Film (Official Charts)** EST downloads VOD rental	**Digital Games (GSD)** Full game downloads
	Digital Film & TV (Futuresource and Omdia) SVoD Pay TV EST VOD	**Digital Games (Omdia)** DLC Downloads Mobile Subscriptions Casual and Social
		Hardware (NielsenIQ) Consoles Peripherals and accessories

FOCALDATA

FOCALDATA CONSUMER TRACKER

It's not enough to just understand what is selling in the market, our members also need to understand what is driving consumer behaviours and to that end ERA provide a Consumer tracking service in conjunction with Focaldata allowing us to accurately track changes in consumer behaviours and predict the changes that will likely occur in the market.

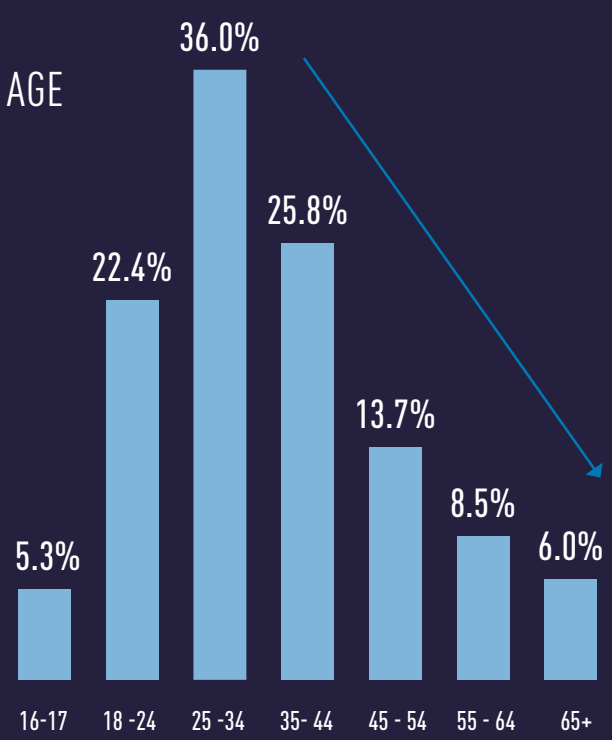

Members can access this for free as part of their membership subscription.

The Focaldata panel consists of approximately 2,000 consumers which are nationally representative and the panel is surveyed twice a year to track device choices and behaviour across music video and games, as well as newer areas such as audiobooks and podcasting.

AUDIOBOOKS

36% of 25-34 year olds have downloaded an audiobook in the last 6 months

AGE

GENDER

Male 20.6%

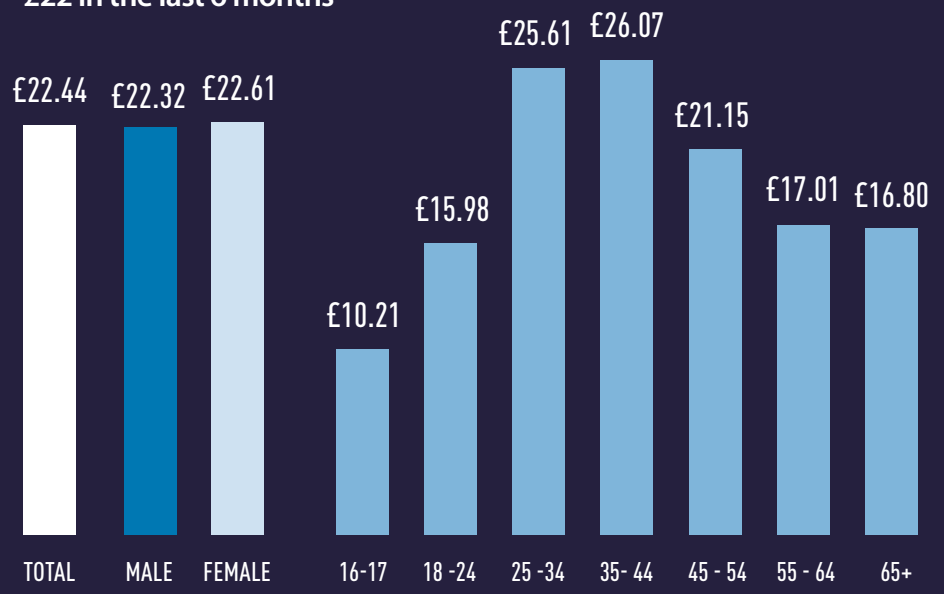

Female 14.3%

AUDIOBOOKS

With the average buyer purchasing 5.4 audiobooks in the last 6 months

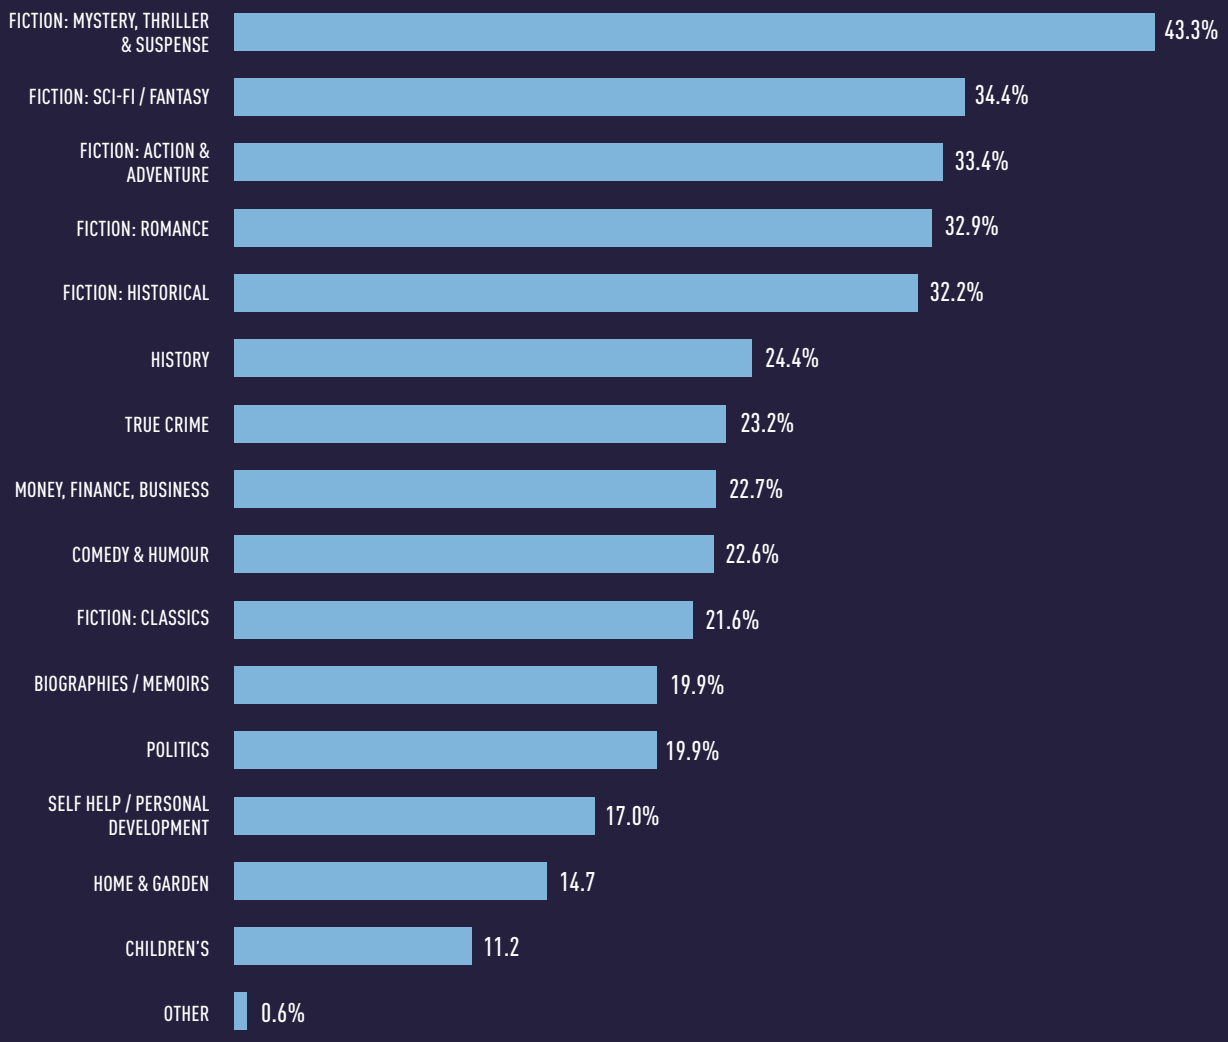

And spending approximately £22 in the last 6 months

AUDIOBOOKS

With mystery and thrillers the most popular genre

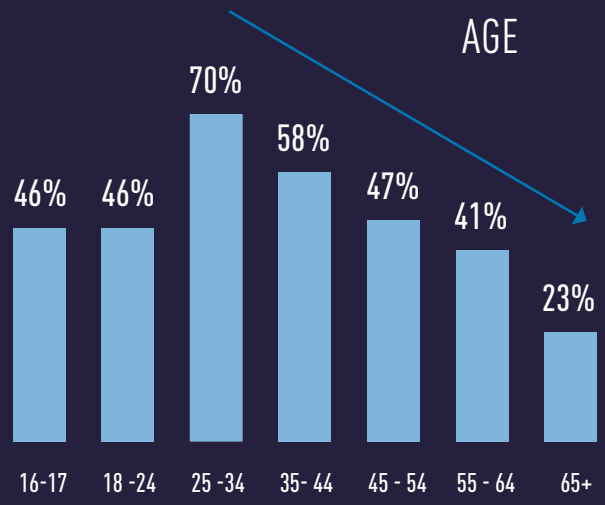

Podcasts

70% of age 25-34 year olds have listened to a podcast in the last 6 months

GENDER

Male 50%

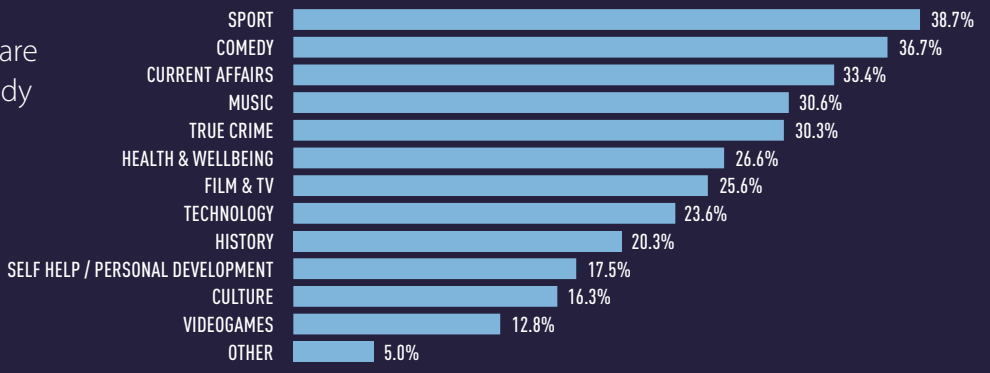

Female 43%

The average per week listening time is 3.8 hours

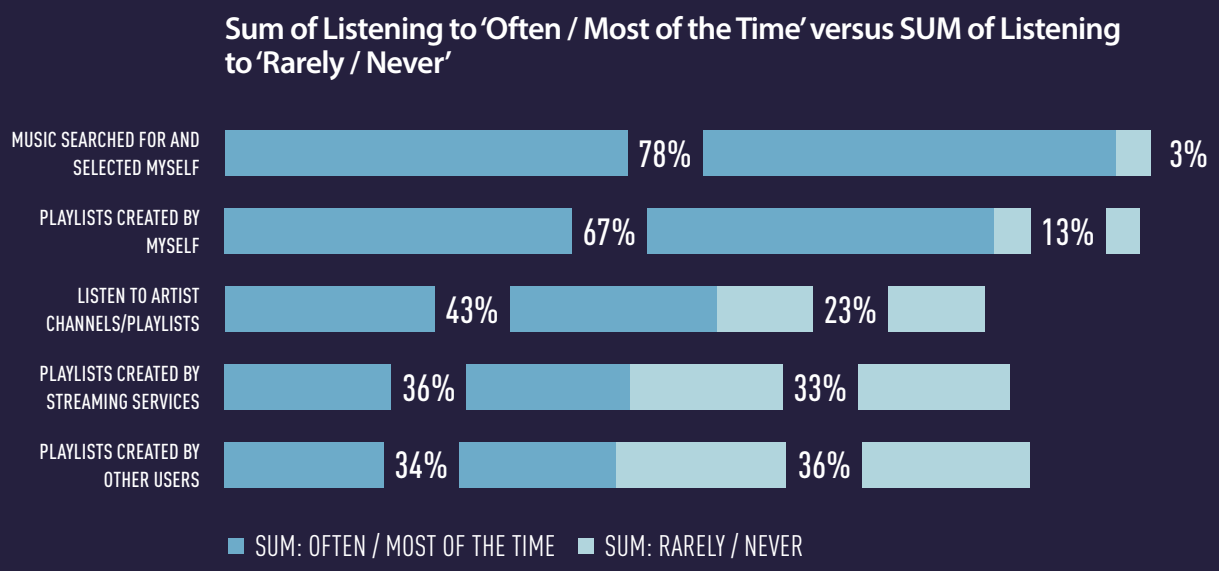

And the most popular genres are sport and comedy

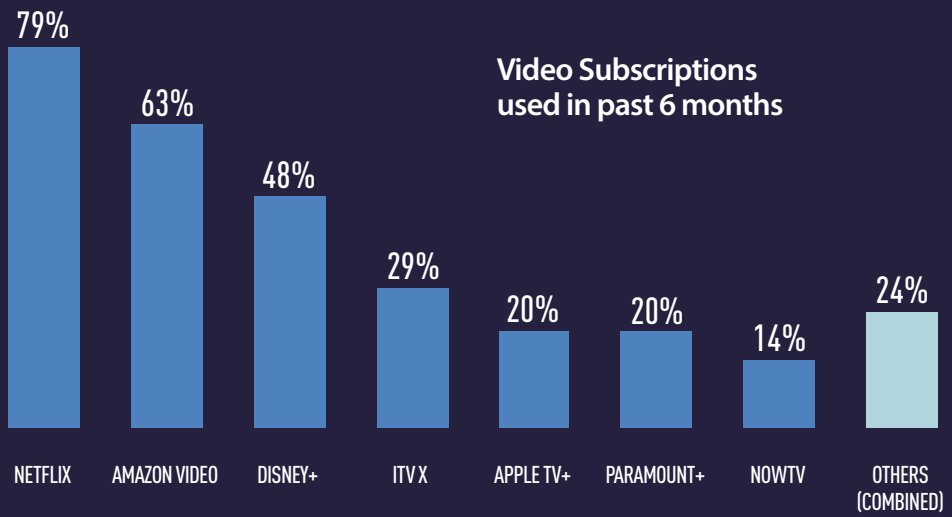

Playlists

Self-search, selection and personal playlist creation command more listening time among streamers than playlists created by the services themselves

Video Subscription

Netflix has the highest number of subscribers with 79% of the population having used it in the last 6 months. The data suggests the average UK subscriber has 2.9 video subscriptions

In addition to our own policy agenda we are also a member of:

INDEPENDENT RETAILERS CONFEDERATION

One of ERA's key partners in the independent retail space is the Independent Retailers Federation, which provides a lobbying platform for like minded trade bodies in the independent retail space. Much of the focus in 2025 was spent looking at ways to support small businesses in the current economic environment. This included lobbying on business rates, postage, EU regulation etc.

THE ALLIANCE FOR IP

ERA has been a member of the Alliance for IP since its inception in 1998. The Alliance is a UK based coalition of over 20 organisations representing businesses and creators from the worlds of audio visual, music, toys and games, sports, publishing and many more. The Alliance campaigns to ensure that consumers are able to enjoy the content and products they love whilst also campaigning for the value of IP rights in the UK. During 2025 the Alliance once again hosted a successful House of Commons Reception and provided input into a number of key policy areas including Artificial Intelligence and Copyright.

THE INDUSTRY TRUST

The Industry Trust is another of ERA's key lobbying partners who address the ongoing challenges of film and TV copyright infringement by inspiring audiences to consume content via legitimate sources. Their Moments Worth Paying For campaign is now well established and drives consumers to respect the value of the creative content they consume by watching only on legal and genuine sites including ERA member digital services and/or legitimate physical formats. The Trust also provides insight into copyright infringement as well as working on initiatives with organisations such as Crimestoppers to educate infringers.

RECORD TOKENS

Record Store Day and Record Tokens continued to work together this year, promoting various campaigns including Father's Day, Christmas and Record Store Day celebrations throughout April.

Record Tokens are the perfect gift for music lovers, from first-time collectors to seasoned buyers. Accepted across the UK by a selection of independent record shops, the tokens are redeemable both online and in store. The perfect way to begin an impressive life-long record collection!

Social campaigns included Father's Day, Christmas, a special collaboration with Bowers & Wilkins and even a hidden albums cover initiative to ring in celebrations for National Album Day 2025. With the help of stockists across the UK, Record Store Day produced eye-catching assets featuring the personalities from behind the counter – with Crash Records and Assai in Glasgow starring in comedic adverts to catch the eye of the music community.
Total activity across all Record Tokens content amounted to over 689k total impressions, a 105% increase from 2025.

As ever, the Record Tokens team outdid themselves with Record Store Day support in the run up to the campaign. From newsletter features to celebratory posts, their digital channels flew the Record Store Day flag! The Record Store Day team are grateful for their continued support and can't wait to see what 2026 will bring.

Record Store Day

2025 marked Record Store Day's 18th anniversary and its most successful year to date. From the announcement of Sam Fender as the year's ambassador to a record number of independent record shops joining the celebrations, RSD 2025 showcased the continued strength and cultural relevance of the UK's indie record shop community. With unprecedented sales figures, historic chart impact and more than 70 official in-store events nationwide, it was a standout year for the campaign.

Johnny Marr at Piccadilly Records receiving his RSD Legend Award

Just look how much RSD stock there is to unpack!

This year saw an all-time record of 278 independent record shops taking part, underscoring the increasing health of the sector. Vinyl album sales through UK indie record shops reached their highest weekly total since at least 1994, marking a significant milestone for physical music retail.

During RSD, vinyl album sales in independents rose to more than 270% above the weekly average for 2025, while overall UK vinyl sales - including non-indie retailers - grew by 80% week on week. Compared with last year, RSD 2025 delivered an impressive 18% uplift in total sales, officially making it the most successful in the event's history. Independent shops also saw their share of weekly vinyl sales rise dramatically - from a typical 34.6% to a remarkable 72.1% during the week of Record Store Day.

A major highlight of the campaign was the announcement of Sam Fender as the official Record Store Day UK 2025 ambassador. The news generated widespread national media coverage and huge social engagement, particularly among younger audiences. Fender's support for independent record shops helped amplify the campaign and brought renewed attention to the importance of local music retailers.

Record Store Day also made its mark on the Official Charts, with the RSD-exclusive pressing of Oasis's *Time Flies – 1994–2009* reaching No.3 on the Official Albums Chart. Notably, nine of the ten top-selling albums on the day were by UK artists – a notable achievement in a globalised streaming era and a testament to the day's cultural impact.

Across the UK, more than 70 official events brought Record Store Day to life, including live performances, DJ sets, artist signings and exclusive release drops. Social engagement surged nationwide, with significant increases among younger and female audiences, reflecting the widening

reach and inclusivity of the campaign.

The spirit of Record Store Day continued throughout the year in Behind the Counter, the original video series created by Record Store Day and Classic Album Sundays in association with Bowers & Wilkins. Celebrating the people, histories and communities behind the nation's independent record shops, the 2025 twelve-part series reached more than 5.5 million viewers, marking a new milestone in its growth and cultural resonance.

Record Store Day UK extends its sincere thanks to all the independent record shops, artists, labels and partners whose support, creativity and passion helped make 2025 a truly historic year for the campaign.

Pandemonium (Bournemouth)

THE RECORD CLUB

Since 2020, The Record Club has created a space for music lovers to celebrate new releases from their favourite artists, with their favourite artists. Hosted by BBC Music's Jess Iszatt, The Record Club welcomes new musical guests and champions from across the music scene with bi-monthly episodes.

A collaboration between Record Store Day, National Album Day, the BPI and The Official Charts, The Record Club originally launched during the pandemic as a solution to help record shops facilitate mail order – and quickly amassed over 250k views over its first year, featuring guests including Blondie, Paloma Faith, Viagra Boys and Evanescence.

2025 brought a plethora of new guests and past favourites, including AJ Tracey, Divorce, Celeste, Nova Twins, ALT BLK ERA and Black Country, New Road. In total, we welcomed over 20 artists, amassing over 54k total live broadcast views. In tribute to the independent record shop scene, each episode features a special question from one independent retailer. Questions from all over the UK flooded in, including Spinning Around Records in Telford, Roan Records in London, The Rock Box in Camberley and Phoenix Sounds in Newton Abbot – plus many other independent shops. Thank you all for your questions!

For the first time ever, The Record Club hosted a live episode – brought to viewers from The Mercury Prize 'The Mercury Fringe' in October. The episode, in association with the PRS Foundation and Bowers & Wilkins, was hosted by Jess Iszatt and welcomed Lily Fontaine of English Teacher. Live viewers enjoyed an honest discuss of Lily's experience winning The Mercury Prize in 2024, her songwriting process and even an extra-special Record Shop question from Reflex Records in Newcastle.

Now in its fifth year, The Record Club continues to engage music lovers with their favourite artists. 2025 saw a total of over 753k social media video views, reaching millions across various social platforms. The Record Club is proud to celebrate its continued partnership with Bowers & Wilkins, reinforcing our commitment to championing new music, physical releases, and record shops as we move into 2026.

2025

- **21 episodes - 21 guests**
- **Total Live Broadcast Views: over 54,000**
- **Total Social Video Views: over 753,000**

NATIONAL ALBUM DAY

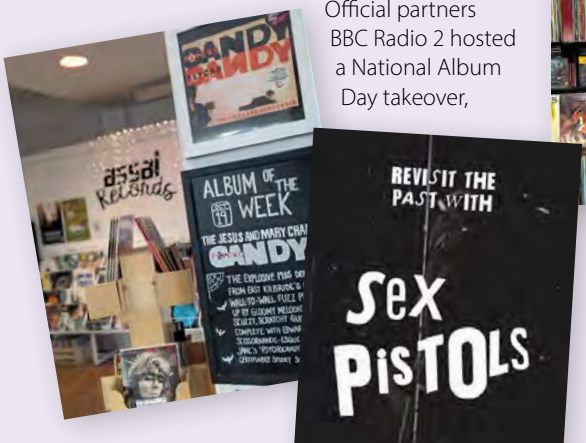

National Album Day returned for its eighth consecutive year, celebrating Rock and all the legendary artists who not only defined the genre but inspired a generation of music lovers. A collaboration between ERA and the BPI, National Album Day stands to honour "the album" as a body of work, offering fans a selection of titles available exclusively via participating physical and digital retailers. This year, festivities were set for Saturday 18th October, with special titles including Queen's *A Night At The Opera*, The Jesus and Mary Chain's *Psychocandy*, Sex Pistol's *Never Mind The Bollocks*, with additional releases from Patti Smith, Liam Gallagher, Manic Street Preachers, Architects and many more.

Official partners BBC Radio 2 hosted a National Album Day takeover, celebrating the heritage artists of Rock music with themed shows. Sophie Ellis-Bextor's Kitchen Disco played rock bangers from acts including Blondie and Oasis. Other programming celebrating National Album Day included Shaun Keaveny's Friday Rock Show, special segments with Romesh Ranganathan and Zoe Ball, and the legendary Debbie Harry joining Shaun Keaveny on Jo Whiley's Radio 2 show to talk about the re-issue of Blondie's 1999 album *No Exit*. Lifelong Queen mega-fan Bill Bailey hosted Eras: Queen – exploring the backstory of the band through the lens of their operatic masterpiece *Bohemian Rhapsody*, marking its 50th anniversary. Finally, Radio 2 hosted a four-part series dedicated to this year's National Album Day theme: *Women Who Rock*, telling their stories across four decades. Alternative Sounds of The 90s with Dermot O'Leary blasted music from Nirvana, Faith No More and Skunk Anansie, along with many other iconic songs from Rock acts.

National Album Day enjoyed additional activations including a definitive chart of the biggest selling Rock & Metal albums of the century by The Official Charts – which delighted mega-fans. Plus, listening experiences with Pitchblack Playback, a special exclusive from PPL revealing Queen as the most played Rock band of the century and activities spread across independent record shops, HMV and more.

As always, National Album Day was led by special Album Champions, and this year was no exception. We were pleased to welcome Wolf Alice, Nova Twins, Architects, metal icons Iron Maiden and Joakim Brodén of Sabaton to take on the torch and help spotlight the enduring power of the album format.

Digital activations to celebrate National Album Day were their best ever recorded, with over 1million impressions across National Album Day channels alone. Additionally, National Album Day launched a re-inspired competition, inviting designers from across the nation to submit a mural design inspired by the theme of Rock music. Brandon Burch was crowned the winner, with his design (painted by Sean Whelan), immortalised on the wall of Bristol's heavy metal bar The Gryphon.

Many thanks to our official partner BBC Radio 2, our digital and physical ERA members, the participating artists and labels for your support in making this National Album Day one for the history books!

To find out more about National Album Day's activity, head to our website **www.nationalalbumday.co.uk**

ERA INDEPENDENT CONFERENCE 2026

The fifth annual ERA Indie Conference took place on Monday January 12th, 2026, with almost 300 attendees across indie shops, labels and suppliers welcomed once again to the event, which was hosted at the wonderful Coin Street Neighbourhood Centre, Waterloo. This was the biggest number of attendees ever and surpassed our wildest expectations.

The day opened with Rich at WarChild letting our members know how the money raised by Record Store Day supports vulnerable children in conflict zones and Rich was followed by Will Wilkin at the BBC who outlined how BBC works with ERA run events like Record Store Day and National Album Day.

After a virtual tour of Bicester the audience were treated to 3 panels covering Merchandising, Carbon reduction and a Label panel looking at how best shops and labels can maximise sales.

The afternoon as ever was given over to speed dating visiting stands and meeting label representatives

The day was rounded off by some wonderful comedy courtesy of Alistair Clark, a record shop owner turned comedian and then a fabulous performance from Walt Disco, thanks to EMI North.

Thanks too to all our sponsors on the day – Lasgo, Dynamic Distribution, Sodapop, Lil' Packaging and Little Amber Fish

SUMMER PARTY AND ENTERTAINMENT CHAMPION AWARDS

ERA hosted its third annual Summer Party and Retail Awards on Wednesday 3rd September 2025, bringing together members, partners and friends for an evening dedicated to celebrating excellence across the entertainment retail sector. Held once again at EastCheap Records in London, the venue's warm, vinyl-filled surroundings provided the perfect backdrop for a night of recognition, connection and industry camaraderie.

More than 200 attendees joined us for the occasion, representing a broad cross-section of the entertainment landscape, including Amazon, Universal, Warner, Official Charts, Rarewaves, HMV, Key Production, Rough Trade and many more from across ERA's membership. The strong turnout reflected the continued growth, innovation and collaborative spirit of the sector.

This year's awards honoured an outstanding group of Entertainment Champions and Rising Stars whose work has made a meaningful contribution to the health and progression of the industry. Nominated by their peers and selected by the ERA Executive Board, each winner embodies leadership, dedication and a commitment to driving positive change.

From championing physical music and advancing metadata solutions to supporting indie shops nationwide and driving impactful sales and campaign activity, this year's winners reflect the depth of talent and passion across ERA's diverse community.

The evening served not only as an opportunity to acknowledge exceptional achievements, but also as a chance for the industry to come together, reconnect and celebrate another year of progress.

This year's honorees were:

- **Lou Jackson**, co-owner of Bury independent record store Wax & Beans - which offers the very winning combination of vinyl and coffee – who was recognised for her work to standardise data for physical product;
- **Magali Clapier**, Director, Licensing of Spotify, who led ERA's work in the metadata project run by the Intellectual Property Office to ensure artists, labels, songwriters and publishers get paid as quickly and accurately as possible;
- Warner Music Independent sales reps **Ben Edwards and Dave Murray**, singled out for their long-time support and advocacy for indie retail and Record Store Day;
- Official Charts Company Director of Operations **Chris Austin**, honoured for his contribution across the music and video sectors and his central role in the development of the Official Charts Company's new online platform;
- Indie label pioneer **Iain McNay** of Cherry Red Records, honoured as a key creator of the joint ERA-BPI promotion National Album day;
- Retail veteran, former ERA co-Chair and now commercial director of home delivery specialists Rarewaves **Rudy Osorio**, honoured for his wide-ranging service to the music, video and games sectors since he began his career in entertainment as a shop assistant at HMV's legendary Oxford Street London store 35 years ago.

We look forward to welcoming you all back next year for another unforgettable evening.

2025-26 BOARD MEMBERS

EXECUTIVE BOARD

Kim Bayley
CEO ERA
Kim has been ERA's CEO for over 20 years and works alongside ERA's Chair in driving ERA's strategy and overseeing ERA's work.

Linda Walker
NON EXECUTIVE CHAIR
ERA
Linda is Non Executive chair of ERA, most recently having spent 30 years at Warner Music, where she was SVP Commercial. She is also Senior Business Development Manager for Pozzoli SpA.

Drew Hill
TREASURER
Proper Music Distribution
Drew is Managing Director of Proper Music, having joined in 2007 from the Walt Disney Company. He runs the Group's distribution operation. He also chairs the Official Charts Board.

Paul Firth
Amazon
Having started his career as store manager at MCV, Paul Firth spent nine years at Entertainment UK where he worked in both the music and video teams, culminating in a role as head of music. After two years at Lovefilm, he transferred to Amazon where he now heads up Amazon Music.

Phil Halliday
hmv
Phil joined HMV in June 2020 after a career spanning the media and products industries. He has been MD since that August. Since joining, he has overseen development of new category expansions.

Alan Jordan
Reflex
Alan is the owner of Reflex Records in Newcastle and Chairs the Independent Retailers Group within ERA.

Safiya Lambie-Knight
Spotify
Safiya has worked at Spotify since 2017 and is currently Head of Music Partnerships for Northern Europe, having previously spent almost 5 years at Vevo as head of music and talent..

Lizzie Dickson
YouTube / Google
Lizzie is head of Music for YouTube UK having worked at YouTube and Google since 2013 across music partnerships and label and artist relations. Previously Lizzie spent 6 years at Universal Music heading up Digital Strategy.

THE ERA BOARD IS THE RULING BODY OF THE ENTERTAINMENT RETAILERS ASSOCIATION. IT COMPRISES 18 TO 20 COMPANY REPRESENTATIVES ELECTED BY THE MEMBERSHIP WITH SIX POSITIONS RESERVED FOR INDEPENDENT MEMBERS. THE BOARD IS COMPLEMENTED BY AN EXECUTIVE BOARD DRAWN FROM THE OVERALL BOARD WHICH IS RESPONSIBLE FOR THE STRATEGIC DIRECTION OF THE ORGANISATION.

GET CLOSER TO THE PEOPLE REALLY DRIVING THE ENTERTAINMENT BUSINESS

THE DIGITAL ENTERTAINMENT AND RETAIL ASSOCIATION

For more than 35 years, ERA – the digital entertainment and retail association – has been the voice of the digital entertainment services and retailers who drive the £12bn UK music, video and games sectors.

REPRESENTING A £12BN SECTOR

ERA brings together over 300 independent record shops, music, video and games chains as well as the largest digital music and tv services including Amazon, Spotify, Sky Virgin and YouTube, whose commercial value to the creative sector is over £12 billion.

INDUSTRY-LEADING FAN PROMOTIONS

RECORD STORE DAY UK 12.04.2025

NATIONAL album day

ERA has been the driving force behind Record Store DayUK for 15 years , turning it into the most successful new music promotion of the millennium so far, sparking a dramatic revival in indie store numbers and spawning the vinyl revival. ERA has also co-ordinated National Album Day for the last 7 years.

24/7 RESEARCH, GROUNDBREAKING INSIGHT

From its industry standard, 10 year mass consumer tracking study to its shareholding in video and music data source the Official Charts Company, to bespoke research for individualmembers, ERA provides essential tools to help your team better understand the entertainment landscape. Our groundbreaking work on defining Superfans has set the tone for entertainment industry's next leap forward.

UNRIVALLED NETWORKING

ERA provides numerous opportunities for even the fiercest competitors to meet and discuss the issues and trends of common concern. Our Indie Conference, AGM and ERA Champion Awards are diary fixtures for entertainment's digital and retail. community.

AN EFFECTIVE VOICE TO GOVERNMENT

The enormous scale and success generated by streaming and digital entertainment services means it is increasingly important to ensure their voice is heard with a dedicated in-house team and external consultancies working to engage with both Government and the wider creative industries.

PRAGMATIC AND COMMERCIAL

In a business driven by passion – and sometimes emotion – ERA provides a pragmatic, commercially-grounded counterbalance, always seeking common ground and win-win solutions.

In 2025 ERA opened up its membership to related businesses in Entertainment with a revamped Affilate Scheme.

Join the hundreds of companies in the UK Entertainment Sector who access best in class industry data and benefit from ERA member networking opportunities.

Access to 10+ years of consumer behaviour data

Covering purchasing and subscription data broken down by demographic 2x per annum.

- Hardware usage across music video and games
- Subscription Usage for music video and games services
- Purchasing spend and choice of retailer
- Audiobook and podcast spend, use and serviceto the creative sector is over £12 billion

Access to weekly monthly quarterly industry sales data for music video and games

- Value
- Units and streams
- Top 200 Charts

Bespoke research projects

Bespoke insight projects have included:

- Superfans
- New music streaming models
- Attitudes to vinyl
- Discovery
- Piracy behaviours

Networking opportunities

Affiliate members benefit from access to the ERA Independent Conference, the ERA Summer Party and Awards, ERA Insight events as well as the opportunity to present to ERA members.
